I. IDENTIFICATION OF WITNESS

Q: Please state your name, occupation, and business address.

A: My name is Magen Brooks. I am the Office Manager for the Puget Sound Pilots, a position I have held since July 2021. My business address is 2003 Western Ave., Suite 200 Seattle, WA 98121.

Q: Please describe the nature of your position with PSP.

A: As PSP Office Manager, I am responsible for preparing the PSP annual budget and managing PSP's relationships with financial institutions, auditors and outside attorneys. I'm also responsible for management of employee relations, negotiating contracts with vendors and suppliers, transportation system data analysis, administrating collective bargaining agreement negotiations and providing assistance to the PSP President, Executive Director and Board of Directors. A copy of my CV, which lists my job responsibilities with PSP, is Exhibit MB-02.

II. PURPOSE OF TESTIMONY

Q: What is the purpose of your testimony?

A: My testimony addresses three topics. First, I will present a comparison of the transportation charges per pilotage assignment that were collected in 2021 and the actual reimbursed out-of-pocket costs to pilots in 2021, which exceeded the amount authorized by the tariff and billed at a rate of $168.20 per assignment by $131,810 or 12.2%. Second, to the extent individual expense categories in the PSP 2022 pro forma statement of operations exceed the expense levels experienced in 2021, I will explain the reasons for the increased level of each expense category projected for 2022. Third, with respect to individual expense categories in the
PSP 2023 pro forma statement of operations, I will explain the reasoning behind adjusting the
majority of those expense categories by a cost-of-living adjustment (“COLA”) of 5% and, for
those expense items that are projected to be lower or higher than the 2022 pro forma statement of
operations, I will explain the reasons for those differentials.

Q: Please explain what is being displayed in Exhibit MB-03, which shows all the
transportation expense charges reimbursed to PSP pilots in 2021.
A: This exhibit shows all the payments made by month in 2021 to the 17 different
transportation vendors that provided one or more means of transportation to PSP pilots in
transiting to or from a pilotage assignment. Of the 17 vendors, a total of 15 provided
transportation services by automobile. These included reimbursements to pilots for mileage
expense through Zoho, reimbursements made to pilots who did not submit their reports through
Zoho, Lyft, Green Car Club, All Black Limo, Chris Cook Transportation, Evergreen Town Car,
Fife Maritime, Joyce Rigby, Randall Wills, Wellington Transportation, Seattle Limo, Marek
Radzimirski, Super Limo, and Semper Fi Chauffer. There are also two air transportation vendors:
Perry Cook Flight and Rite Brothers Aviation.

Q: What amount was authorized as a specific charge in the tariff for pilot
transportation expense?
A: The tariff authorized a charge of $168.20 per pilot assignment.

Q: Was the $168.20 transportation charge authorized in the tariff sufficient to cover the
actual transportation costs incurred by PSP pilots in 2021?
A: No. The total transportation charges invoiced in 2021 totaled $1,080,685. That figure compared with a total in actual transportation expense of $1,206,947 as shown on Exhibit MB-03. This resulted in a deficit in 2021 of $131,810 or 12.2% more than the tariff authorized in transportation charges.

Q: For 2021, what amount of tariff charge would have been necessary to fully fund the actual transportation costs incurred by PSP pilots?

A: To fully fund what PSP expended in transportation costs for pilots traveling to or from a pilotage assignment, the charge in 2021 needed to be $187.85 per assignment.

Q: What level of transportation charge is PSP projecting in its requested 2022 tariff?

A: PSP is requesting $195.36 transportation charge per assignment based on the 2021 average transportation cost paid by PSP per revenue assignment.

Q: Exhibit MB-03 shows that the total number of invoices in 2021 with a transportation charge was 6,425. Can you explain why that figure does not correspond with the number of assignments reported to the Board of Pilot Commissioners for 2021?

A: Yes. It sometimes happens that an assignment does not have an associated transportation charge and it can also happen that a transportation charge can occur without an assignment. A pilot could already be at the location of a revenue assignment – for example, multiple harbor shifts in the same location may not require transportation for each assignments. It can also happen the other way where an assignment cancels after the pilot is already on their way to the assignment. In this case, the assignment would still have the job number, so the transportation is
billed to the shipping customer unless the cancellation was so early that there is no associated
transportation charge. As a result, there is not always a one to one relationship between pilotage
assignment and a transportation charge.

Q: Exhibit MB-04 is the PSP 2022 pro forma statement of operations. Please explain
what is displayed on this exhibit.
A: This exhibit shows projected PSP revenues and costs for 2022 utilizing the same
regulatory format that CPA Weldon Burton used in preparing Exhibit WTB-03. It includes
adjustments that PSP staff have made to our budget planning documents to reflect changes that
have occurred through May 31, 2022 and revenues and expenses for the period of June 1 through
December 31, 2022.

Q: Please describe how many expense categories were adjusted by a COLA and how
many were changed upward or downward on some other basis.
A: There are 61 expense categories adjusted by COLA, and 36 expense categories that were
adjusted up or down based on other factors.

Q: Please explain the rationale for using a 5% inflationary adjustment for the categories
you just described.
A: Our rationale was to try to anticipate how costs will be affected by external economic
factors and to try to make a conservative but accurate assessment of those future costs. Inflation
has been much higher than anticipated throughout 2022, so some of our estimates may prove to
have been too conservative.
Q: With respect to those expense categories with individualized adjustments up or down from the actual experience in that category in 2021, please describe the basis for each of those adjustments.

A: Those adjustments apply to the following categories:

1. Attorney Fees General and Attorney Fees UTC were adjusted up due to the $300,000 projected by our counsel for 2022.

2. Computer maintenance – PA was adjusted up based on the projected service and maintenance needed to our systems based on information provided by our IT contractor.

3. Consulting fees were adjusted down, due to staff turnover in finance and administration. PSP retained the services of its long-time staff accountant/controller on a consultant basis. The position will be filed in Q3 or Q4 2022. The current financial commitment for the accounting consultant is $125,000/year. PSP also retained a data analytics consultant to evaluate trends in assignment and work-flow data to identify efficiency improvements at $75,000/year. An additional $20,000 was added to the consultancy budget as PSP necessities additional business consulting help from time to time.

4. Dues MM&P and Dues APA were adjusted up due to the increased number of licensed Pilots anticipated to join PSP. Employee health and welfare for Seattle and PA were adjusted up to an increased number of employees.

5. 401K contributions were adjusted up because we had two new staff members who became eligible for 401K contributions in 2022.

6. Food – PA was adjusted up due to increased food costs and increased number of pilots.

7. Insurance Seattle, Insurance PA, Insurance Boats, and Insurance License and Defense were adjusted up or down based on our renewal rates through the providers.

8. License fees – Pilots was adjusted up due to the increased number of pilots.

9. Pension, Puget Sound Pilots was adjusted up due to the expected pay-as-you-go retirement expense levels being experienced in 2022.

10. Puget Sound fuel and Juan de Fuca fuel expense was adjusted up based on increased fuel costs.

11. Juan de Fuca, prev. maintenance was adjusted up due to maintenance items on our service schedule for this boat through 2022.
12. Salaries, Regular-Seattle, Salaries, Regular -- PA, Salaries, Overtime - Seattle, and Salaries, Overtime – PA were all adjusted up based on increased salaries and increased number of employees at the Seattle Office.

13. Taxes, FICA/Medicare, Seattle, Taxes, FICA/Medicare – PA, Taxes SUTA – Seattle, Taxes, SUTA – PA, Taxes, FUTA – Seattle, Taxes, FUTA-PA were adjusted up because those taxes are based on wages which go up with increased wages paid.

14. Training, Pilots was increased due to the limited training completed in 2020 & 2021 due to the COVID Pandemic, and increased number of Pilots.

15. Transportation Expense—Seattle was increased due to the increased number of assignments, and increases in vendor rates which were caused by increased fuel costs.

Q: Exhibit MB-05 is the PSP 2023 pro forma statement of operations for the first year of operations under the tariff proposed by PSP in this rate proceeding. Please explain what is shown on this exhibit.

A: This exhibit is designed to show the revenue requirement by pilotage fee category necessary to fully fund the tariff requested by PSP as well as the expenses projected in each of the same categories on the 2022 pro forma statement plus an additional category requested by PSP. The difference between the total revenue requirement and the total expenses projected for 2023 is reflective of the amounts attributable to PSP’s distributable net income proposal for each of the 56 PSP pilots projected to be licensed as of the first quarter of 2023 plus reinstatement of pilot medical insurance coverage in the tariff.

Q: You mentioned that there was one new expense category included in the PSP 2023 pro forma statement of operations. What is that?

A: That is a new expense category for to account for costs associated with PSP’s diversity, equity and inclusion (DEI) program. This expense category is explained in the testimony of PSP Executive Director Charles Costanzo.
III. CONCLUSION

Q: Does this conclude your testimony?

A: Yes.
