EXHIBIT 3
BROADBAND PLAN

This Broadband Plan, as contemplated by RCW 80.36.650(3)(a)(ii) and WAC 480-123-110(1)(d), is being adopted by **Whidbey Telephone Company** (“Company”) with the expectation that it will be submitted to the Washington Utilities and Transportation Commission (“Commission”) as one component of a petition by the Company for support from the state Universal Communications Services Program established by RCW 80.36.650 (“Program”). Pursuant to RCW 80.36.650(3), a recipient of support from the Program is to have adopted a plan to provide, enhance, or maintain broadband services in its service area. As set out in WAC 480-123-110(1)(d), the broadband plan is to include specific elements, but only to the extent applicable to that particular broadband plan. The broadband plan does not have to include all elements, but potential elements include the following: (1) a multi-year investment plan; (2) specific project(s) that are projected to provide or enhance broadband services at speeds required by the Commission or the Federal Communications Commission; (3) a plan for maintenance of broadband services in the provider’s service area; (4) a description of how the provider will enhance broadband services in its service area; and (5) any other information that the Commission may request to assist in the Commission's review and analysis of the provider's broadband plan. Where there are specific projects, the project information is to include an estimated timeline, geographic location, number of locations passed, and upload and download speeds that are projected to be produced by the project.

The Company has already constructed facilities sufficient for it to satisfy criterion three of WAC 480-123-110 and, as a result, has placed into service robust broadband infrastructure throughout all populated portions of its service area. Consequently, the Company intends to apply

for Program support to allow it to continue to provide telecommunications services and broadband services at or above the levels that it is providing today. Accordingly, the Company's broadband plan includes the following elements:

Broadband Plan:

In addition to the foregoing, the Company’s broadband plan includes continued investment by the Company in the maintenance and enhancement of its telecommunications and broadband network.

The Company anticipates that, if its application for support from the Program during the coming Program year is granted, its expenditures during that period in providing, enhancing and maintaining broadband services in its service area, including payments in support of the above-mentioned RUS financing, will exceed the funding that it expects to receive from the Program for that period. This expectation reflects the Company’s belief that it will continue to be guided by its goal of providing robust broadband capability wherever such capability is needed within the Company’s service area.

The foregoing Broadband Plan was adopted by Whidbey Telephone Company on July 31, 2022.
