Understanding the System of Systems
NG9-1-1 CORE FUNCTIONS

NG9-1-1 Ecosystem

Next Generation 9-1-1

How NG9-1-1 Operates

Initial Deployment: Transitional LNGs
Later: Direct IP interfaces

Could be any combination of state, regional or county PSAPs

PSAP Deployment Options

- PSAP equipment is IP or NG9-1-1 capable before core NG9-1-1 is installed
- PSAP equipment or software upgraded when core NG9-1-1 is installed
- Multiple PSAPs deploy a hosted (shared) call handling system
- PSAPs use LPGs to interface to core NG9-1-1 system, operating temporarily as 'legacy PSAPs'
- Any combination of the above

End-to-End IP - Timeframes

- Improved services are timeframe interdependent between carriers, other originating providers and NG9-1-1

Carriers

Implement IMS

IP interface
