Subject: Re: Piert Rd Crossing petition delay requests.

Paul and Kathy

Thanks for being at the meeting today via phone.

Subsequent to today's meeting and our meeting with Union Pacific it has become apparent that Union Pacific believes there is potential fatal problem with Benton Co. Petition TR 100575. This is the crossing of the Colstor spur served by Union Pacific.

Benton Co. is requesting a 60 day delay of the prehearing conference to allow further investigations into possible measures designed to address Union Pacific's concerns.

With out all of the petitions being approved none of the other petitions become necessary

Closure

As we have discussed previously The Closure application TR-100576 is not desired without the other four being granted.

So unless you have a different administrative suggestion we would request that the closure petition be suspended until such time as we have certainty regarding granting of the petitions 100572 thru 100575.
