This tab is intended to be exactly like the "RESI WUTC Hrs" tab in the Rate Case Model. The difference is that all cell contents are deleted except for the route numbers that are to be used in the representative sample or regulated and non regulated operations and the customers on route which are pulled from the SQL Data in this workbook based on the route numbers. This workbook is kept out of the rate case model as it is usually very large and compromises the integrity of the model and hoardcoded in the rate case model to avoid external links.
