Dense Air Networks US, LLC will provide Radio Access Network (RAN) as-a-service to service providers, municipal entities, and other enterprise customers throughout the state of Washington. RAN as-a-service uses Open RAN network architecture in combination with Citizens Broadband Radio Service spectrum or licensed spectrum to deliver secure high-speed (4G/5G) connectivity solutions to business customers over a neutral host network infrastructure. The furnishing of RAN-as-a-Service requires certain physical arrangements of equipment and facilities of the Company and other entities and is subject to the availability of such equipment and facilities. Such equipment and facilities will include fiber optic cables, small antennas, and conversion equipment attached to poles and other structures. Additional information regarding these services can be found at: <https://denseair.net>
