

A Vista

Here they go again, asking for another raise in our utility bills.

The wind storm may have cost A Vista more money for repairs but it also cost the home owners to repair the damage done.

I'm a 82 year old widow live on S.S. make 1,300⁰⁰ a month - pay 325⁰⁰ lot rent pay car insurance, medical, TV (Basic TV) food, if any left over may be able to go to Lips once a month for a hamburger. No one helps me.

They tell me I need a new roof put on my trailer and new skirting that the wind storm did.

I dont see anyone giving me a handout.

A Nista came up with this great Reward that they would replace your electric furnace and hot water heat with gas for nothing if you would change, Well I did as many others did, So what did they do they raised gas, so you paid more for gas than electric, plus you now have to pay to have not one meter read but two, what a scam. The water heater is a little one that runs cold before you can even get done with a shower and washing your hair.

I don't even want to be on welfare, I still have my dignity Thank God for that. But please no more scam from our electric co. and its rich executives.

Thank you.

Mrs. Darlene White
