WUTC STAFF DATA REQUEST NO. 253

WUTC STAFF DATA REQUEST NO. 253:

RE: Glacier Battery Storage System

What is the anticipated completion date of Pacific Northwest National Laboratory's ("PNNL") use-case testing and analysis, referenced in Exh. No. MM-1HCT, page 18:12-15? As an ongoing data request, please provide any information provided by PNNL regarding this analysis as it becomes available.

Response:

The Glacier Project achieved full commercial operation in September 2016 and the Pacific Northwest National Laboratory ("PNNL") began its baseline and use case testing in December 2016. The testing is expected to continue through December 2017. Puget Sound Energy will provide the final PNNL report once it becomes available.
