Subject: how to listen to the WUTC hearing today

If you are interested in listening to the UTC hearing today on our water case, including both the rate case, and the sale and transfer of Rosario Utilities to Washington Water Services, you can do so by

- 1--coming down to the airport conference room (376-5285) where a bridge line will be set up, or
- 2--calling in from your home to 360-664-3846 (Olympia). You will hear a beep and that means you are "in" and will be able to hearing the proceedings. It is important to mute your phone so they can't hear things going on at your end. If you wish to speak, you can do so when they invite other comments, or you can call ahead and get on the agenda--360-664-1234.

Representing us in Olympia will be Herta ("Hetta") Fairbanks of HDR Engineering. She does rate design analysis. Her background includes running a large PUD (water utility) and she was the WUTC analyst on the first Rosario rate case in 1997.

The hearing begins at 1:30pm.
