**Corporate Contact:** DAISAKU IZAWA

**Corporate Contact Title:** BRANCH MANAGER

**Special Study Information:**

**Remarks:**

On June 3, 2009, I contacted Mr. Daisaku Izawa, Branch Manager, and Mr. Joseph Scott, Operations Manager, for Yamato Transport USA, Inc. (Yamato), at the company's main office and terminal located in Kent, WA. The purpose of my contact was to conduct a safety compliance review of this carrier's provisional household goods authority, as permitted under commission authority THG-63319. This temporary authority was issued on July 23, 2008. The carrier attended the new entrant training in November 2008.

This carrier is associated with the parent company which operates terminals throughout the United States. They are registered with the Federal Motor Carrier Safety Administration under USDOT #260219. I conducted this compliance review on the Kent terminal operations. This review will not be uploaded to MCMIS.

Yamato operates primarily as a freight forwarder in the State of Washington. This is exclusively for Japanese clients, importing and exporting freight throughout the United States and Japan. To date, this carrier has conducted limited intrastate household goods operations. These operations are also limited to Japanese clients moving within the state.

Yamato currently owns and operates two non-CDL trucks and employs two full time drivers. The trucks are insured with the Sompo Japan Insurance Company of America, Policy #ACV11068PO, in combined single limits of \$1,000,000. The vehicles were inspected at the carrier's terminal and issued valid CVSA decals. Refer to ASPEN Inspection Forms Nos. 3 & 4, attached.

This review covered the period of July 23, 2008 through June 3, 2009. During this period, Yamato did not experience any recordable accidents.

I verified that both drivers have valid driver's licenses through the WA State Department of Licensing. The drivers operates primarily within the 100 air-mile radius of Kent, WA, with an occasional trip to Moses Lake, WA. I reviewed the previous six months records of duty status and found the carrier in compliance with CFR Part 395, hours of service.

The following safety violations were noted:

**CFR PART 391 - DRIVER QUALIFICATIONS:**

The driver qualification files failed to contain road tests, initial driving record inquiries and employment applications for their two drivers. I advised Mr. Izawa of the requirements for CFR Part 391.51 and gave him a current copy of the commission

**Part C**

safety guide.

**CFR PART 396 - INSPECTION, REPAIR AND MAINTENANCE:**

The carrier failed to conduct the annual periodic inspections on both vehicles. I explained the requirements of CFR Part 396.17 to Mr. Izawa. He stated that his company would comply with this regulation in the future.

**CONCLUSION:**

Upon completion of this safety compliance review, Yamato received a satisfactory safety rating. The carrier officials express a willingness to comply with commission safety regulations and were extremely cooperation during the course of this review. I am recommending permanent authority be issued to Yamato.

This assignment is submitted for closing.

SafeStat calculates a SafeStat Score to rank carriers in descending order by their safety status (i.e. a carrier with the highest SafeStat Score is the first ranked carrier in terms of poor safety status). SafeStat does not assign SafeStat Scores to all carriers. To obtain a SafeStat Score, a carrier must be deficient in at least two different Safety Evaluation Areas (SEAs). A SEA with a value from 75 to 100 is defined as deficient. SEA Values that are less than 75 are not used in the calculation of a SafeStat Score.

**Individual Crashes - Min: 1 Year, Max: 2 Year**

The report shows all Crashes for at least one year (a year is defined as a total of 12 months of data previous to the date of the report). For a Motor Carrier involved in less than 50 Crashes in the requested year - the report will show Crashes for the previous year up to a maximum of 50 Crashes.

If multiple vehicles of the same Carrier are involved in a single Crash, each individual vehicle is displayed as a Crash and the number of Injuries and Fatalities will be repeated on the additional Crash record(s).

Driver includes Inspection Levels 1, 2, 3 and 6.  
 Vehicle includes Inspection Levels 1, 2, 5 and 6.  
 HM (Hazardous Materials) includes all inspections where vehicle carries Hazardous Materials.

Average # of OOS Viol Per Insp = Average number Out-of-Service Violations per Inspection.

% OOS Inspections = Percentage of Inspections with 1 or more Out-of-Service Violations.

Categories Driver, Vehicle and HM may not add to the All column because two or more of these types of Violations may occur on the same Inspection.
