**Western Power Trading Forum Nomination to the Carbon and Electricity
Markets Stakeholder Workgroup**

On behalf of the Western Power Trading Forum (WPTF), I nominate Clare Breidenich to serve as a member of the Carbon and Electricity Markets Stakeholder Workgroup (MWG).

WPTF is an organization of power marketers, independent power producers, investment banks, public utilities and energy service providers, whose common interest is the development of competitive electricity markets. WPTF has over 80 members participating in power markets within the western states and Canada.

Clare Breidenich has directed WPTF's Carbon and Clean Energy Committee for over ten years. In this role, she leads WPTF's advocacy related to greenhouse gas regulation and policy. She has been actively involved in the development and implementation of California's cap and trade program, particularly as it impacts the electricity sector and is widely recognized as an expert on the interactions between carbon and electricity markets. Clare is also extremely knowledgeable about Renewable Energy Procurement and Clean Energy Standards, and methods for accounting for greenhouse gas emissions, including tracking of renewable energy credits and other environmental attributes.

I believe that Clare's expertise in these areas would make her an excellent addition to the Workgroup and would ensure that the interests of non-utility electricity market participants are represented in discussions.

Thank you,
Scott Miller, Executive Director
Western Power Trading Forum
