Greetings, Customer,

Over the past year, the My Clean Energy program has continued to grow and so has interest in and adoption for renewables across the state and country. This is exciting as many of you have shared that being a part of the clean energy transition is a reason for your participation in this program.

Collectively, you and more than 4,000 other Avista customers have made the commitment to clean, renewable energy. In total, your My Clean Energy subscriptions have represented 62,963,800 kilowatt hours (kWh) of renewable energy this year alone! These investments are helping to offset emissions associated with the equivalent amount of the carbon sequestered by 54,646 acres of U.S. forests or the greenhouse emissions from 9,700 passenger vehicles for one year.

At the same time, we have seen major weather events across the country and drought conditions in the west create havoc on the electric system and result in less renewable generation than in typical years. We have also seen a growing number of corporations and municipalities adopt their own clean energy goals. Together, this combination of increased demand and tightening supply has caused a dramatic run-up in the price for renewable energy credits (RECs).

While it is great news to hear that there is more demand, that also means that these valuable resources have increased in price as well. The My Clean Energy program is designed in such a way that all costs and benefits are confined to subscribers, with no profit to Avista. In order to keep the program viable, Avista has made a commission filing to make the necessary price changes.

As a subscriber in the 100% clean option, if approved, your subscription will change from a \$0.01 per kWh to \$0.013 per kWh starting on your January bill. Based on an average residential customer monthly bill, your contribution would change from \$9.00 per month to \$11.70 per month).

If you would like an opportunity to provide comment to the Washington Utilities and Transportation Commission (WUTC) on our proposed changes or to learn more about this filing, [click here](#) or call 1-888-333-9882 and reference Docket UE-210798.

Written communication can also be provided to the WUTC at:

621 Woodland Square Loop SE,  
Lacey, WA 98503

The WUTC has the authority to set final rates that may vary from our proposed request, which may be either higher or lower depending on the results of the investigation.

You can also contact Avista Customer Service directly at 800-227-9187 with any questions.

Again, we thank you for your continued support of My Clean Energy.
