Subject: CCoGDP Rebuttal to Aquarius Letter 6/20/08

To Whom it may concern:

The Concerned Citizens of Greater Diamond Point has responded to the Aquarius Memorandum dated 6/20/08.

1. Attachment Aquarius Utilities Memorandum 06202008.pdf mailed to Diamond Point water system customers.
2. Attachment CCoGDP_Rebuttal.pdf is the actual letter mailed out to the state agencies to answer incorrect comments made in Aquarius' letter.
3. Attachment Projects_Financial_Matrix.pdf is a breakdown of the loan money being requested by Aquarius by company, number of connections and in-house engineering fees charged to them. Not equally distributed.
4. Attachment DOH_Email_07012008.pdf is an email from the Department of Health Drinking Water Engineer to Aquarius requesting clarification of unexpected changes in the Water System Plan scope alluded to in Aquarius' Memorandum.
5. Attachment PWB_March_Meeting_2008.pdf are the minutes from the Public Works Board where the commissioners requested that Aquarius get an approved rate case increase from it's customers before they could loan them another \$2 million dollars for primarily new storage tanks at all water systems. Financial viability to pay back the loans was the main issue at this meeting.

The financial audit being conducted by WUTC has shown that in-house engineering fees for Mr. Roats was the largest expense in the rate case. Please click on the web site below to see the payroll documents filed with the WUTC:
