Comments on PSE’s CEIP from Dan Mathias, Mukilteo, WA

Thanks again for the opportunity to review and comment on Puget Sound Energy’s (PSE) 2021 Clean Energy Implementation Plan (CEIP). In my February 23, 2022 comments, I suggested that PSE’s CEIP would not sufficiently offset their loss of their coal-fired power resources by 2025. To demonstrate their commitment to retiring their coal-fired resources by 2025 and maintaining a power supply capable of meeting their customers’ energy use, I suggest PSE include a fuel mix pie chart similar to the pie chart below.

If you have any questions regarding my suggestion, please contact me at dananddebe@yahoo.com or (425) 422-8286.
