**WUTC STAFF DATA REQUEST NO. 043:**

**RE: Current SQI No. 5 Calculation**

Using actual call data from 2016 please provide the SQI No. 5 calculation for those callers who selected to speak with a live representative. If 2016 call data is not available, please respond to this data request using 2015 call data.

**Response:**

The 2016 call data is being finalized; therefore, Puget Sound Energy's ("PSE") Response to WUTC Staff Data Request No. 043 is based on 2015 call data. The table below shows PSE's monthly and annual call performance results for those callers who selected to speak with a live Customer Care Center representative.

Monthly Call Performance = (monthly aggregate number of calls answered by a company representative within 30 seconds of a request to speak with a live operator) / (monthly aggregate number of calls received)

Annual Call Performance = average of ((monthly aggregate number of calls answered by a company representative within 30 seconds of a request to speak with a live operator) / (monthly aggregate number of calls received))
