

Kippi Walker
UTC Administrative Law Division
Docket TV 143300

Dear Kippi Walker,

I have received your response on 10-29-14 and respectfully request you to dismiss this case as I did cease as a household goods carrier as I was told to. Somehow your staff has said I kept operating as a household goods carrier or attempted to operate as such. I pulled all advertising I possibly could as directed and any ads still running were due to inability to cancel them due to publishing deadlines. When I Spoke to Megan Banks, I was informed of what wording was allowed and when people did contact me to move certain household goods I informed them that I was unable to use my equipment to load their contents but could load it for them in a vehicle that they provided but also told them what my rates would be in the future should my license be approved. So the subpoena that was issued to myself puzzled me and I have been trying to fix it since which you are aware of.

I received my permit #THG065626 for Johnson's Hauling LLC which means I am now in compliance and it took awhile to save up for that as well as the insurance required for it. I am a single father raising 3 kids, which is why I started my business to hopefully give me some free time to do things with them. I do not have an extra \$500 to just pay off a fine or even go to Olympia since that is about what it would cost me to travel. Again I am asking please dismiss this so I can move forward with my business. I am asking you to please work with me.

I would like to hear back by 10-31-2014

Sincerely
Cary Johnson
