#### Comments

The City of Tacoma supports electrifying the transportation sector and is pleased PSE is actively pursuing efforts toward that goal through the filing of UE-180877. Climate stability is a priority for Tacoma and we believe electrifying the transportation section is a critical strategy in achieving deep levels of carbon pollution reduction.

The City is excited by the comprehensive array of programs PSE proposed to launch including education and outreach, residential off-peak charging, public charging, workplace and fleet charging, charging in multifamily dwellings and providing EV for low income support programs. These are the types of programs both our private and public utilities in Washington Sate need to undertake in order to fulfill the Washington State Department of Transportation Electric Vehicle Action Plan published in February 2015. We ask the UTC to approve these programs quickly.

These programs are important first steps. We hope to see additional and larger programs in the near future and are ready to be a partner in expanding the opportunities to electrify our transportation system to reduce carbon emissions.
