2. WAC 480-123-130(1)(b) - Use of Support

The funds received by the Company from the universal service communications program in calendar year 2017 represents monies that the Company formerly received through the Washington Exchange Carrier Association (WECA) pooling process and the reduction of support under the Federal Communications Commission's (FCC's) CAF ICC Program. As such, the funds from the universal service communications program contributed to the ongoing operation and maintenance expenses of the Company. The funds from the universal service communication program are contributing to the Company's ongoing provision of high-quality basic telecommunications service to customers residing in the area the Company serves.

In December 2017, the Company received \$3,089 from the universal service communications program for the fiscal year ending June 30, 2018 which represents monies that the Company formerly received through the WECA pooling process and the reduction of support under the FCC's CAF ICC Program.

During the first six months of 2018 the Company did not undertake any capital projects, but incurred \$35,758 in operating expenses relating to the maintenance of the network and provisioning of the services. The funds received from the universal service communications program can be viewed as contributing to the Company's ability to perform this work including, without limitation, the repayment of loan funds. In the second half of 2018 the Company plans to continue to upgrade the existing network and is reviewing options to bring more fiber connectivity to the service area or to expand the VDSL technology previously deployed.

3. WAC 480-123-130(1)(c) - Unfilled Consumer Requests for New Basic Telecommunications Service\*

None

\* Service requests that are ongoing but still within normal processing times are not counted as unfulfilled.

4. WAC 480-123-130(1)(e) - FCC Form 477

This form was previously filed on or about March 1, 2018 under Docket UT-180002.

5. WAC 480-123-130(1)(f) - Report on Operational Efficiencies/Business Plan Modifications

The Company continually reviews its operations to determine if efficiencies can be achieved. The Company already has a plan in place to concentrate on improving broadband service while continuing to provide high-quality basic telecommunications service to the customers that are located within the area that the Company serves. The funds received from the universal communications program can be viewed as assisting in the Company's efforts to obtain operational efficiencies. The Company is continuing a long term project to upgrade our OSS/BSS system. This project is designed to more efficiently and effectively respond to customer needs, as well as significantly improve general business operations.
