This message is for Amanda Maxwell,

John Lutz with PMC Moving following up.

I am requesting to set up a payment plan for the penalty amount that had been imposed.

First, I feel there were items that were overlooked in my follow up response I submitted last month, illustrating some of the mistakes that were made when calculating the "penalty"

For example, under Background #10 "390 Violations for using a driver not medically certified..."

Well, 67 of those violations need to be removed since I had been driving the vehicle on those days. And as the owner/operator of the company, I am exempt from needing a DOT Physical card. This is according to the research I have done and your Compliance Investigator, Sandi Yeomans.

So the final total needs to be recalculated since we're talking \$100.00 per offense.

Secondly, and the most salient point, your Investigator Sandi, kept stating, "Our job is not to fine you out of business, but rather to get you into Compliance."

I acknowledge the mistake, which is why I requested the mitigation hearing, but that amount is simply exorbitant. So with that said, I am requesting a forbearance until Jan 1st, 2023

And beginning Jan 1, I will make 12 installments of the recalculated fine.

Please confirm you having received my follow up and I can sign paperwork agreeing to the 12 payments beginning on Jan 1st, 2023

Thanks
