Subject: Chehalis Generating Facility Greenhouse Gas Fuel Content Monitoring Program – Program Approval

Dear Mr. Smith:

The Chehalis Generating Facility (CGF) is subject to the greenhouse gas reporting requirements contained in Washington Administrative Code (WAC) 463-85-120. WAC 463-85-230 requires applicable base load electric generating facilities such as the CGF to submit a proposed fuel content monitoring program to the Energy Facility Site Evaluation Council (EFSEC) for review and approval.

EFSEC received your proposed fuel content monitoring program on December 29, 2008. Your proposed program was reviewed by our contractor, the Southwest Clean Air Agency.

Based on the recommendation of EFSEC's contractor, EFSEC has approved your fuel content monitoring program.

Please contact me at 360-956-2047 or jimla@cted.wa.gov if you have any questions concerning this matter.

Sincerely,

Jim La Spina
Energy Facility Siting Specialist
