

Docket UT-140597  
CenturyLink's Supplemental Response to Data Request RS-4d  
September 3, 2014

Supplemental Response to RS-4d:

Please see the revised Confidential Attachment RS-4d. The attachment has been corrected to include additional failed calls. During the initial hours of the incident, Intrado was solely focused on troubleshooting the problem, assessing the impact, and restoring the service as quickly as possible. After further analysis and investigation, the initial report errantly omitted calls for the first 56 minutes of the service disruption. Intrado has thoroughly re-examined all pertinent call information and provided the following updated results:

	Original Data	Updated Data
<u>Total CenturyLink Calls:</u>	<u>4,452</u>	<u>5,840</u>
- Idaho	0	11
- Minnesota	73	84
- North Carolina	55	72
- Oregon	0	7
- Washington	4,324	5,618
- Unknown	0	48

Respondent: Intrado
