

**Attachment 14 – Description of Pricing and Services for  
Dedicated SONET Ring Partial Ring Service**

This Attachment 14 (Description of Pricing and Services for Dedicated SONET Ring Partial Ring Service) (this **Product Schedule**) is entered into as of the date of last signature by a Party (the **Product Schedule Effective Date**) by and among Verizon Business Network Services, Inc. (“VBNS”), on behalf of Verizon Global Networks Inc. and the former MCI Affiliates identified on Attachment 1.1 to the Agreement (defined below), Bell Atlantic Communications, Inc. d/b/a Verizon Long Distance (“VLD”), NYNEX Long Distance Company d/b/a Verizon Enterprise Solutions (“VES”), and Verizon Select Services Inc. (“VSSI”), on the other hand (VBNS, VLD, VES, and VSSI are hereinafter referred to collectively as “Customer”) and Verizon Services Corp. on behalf of the Verizon operating telephone companies set forth on the signature page to this Product Schedule (individually and collectively, **Verizon**). This Product Schedule is an amendment and restatement of a Product Schedule to the Original MSA, and is attached to that certain Master Services Agreement (**Agreement**), dated as of March 8, 2007, by and among the Parties, and made a part thereof, as of the Effective Date. All capitalized terms not otherwise defined in this Product Schedule, Product Guide, or in the Agreement shall have the meanings set forth in Verizon’s Tariffs FCC Nos. 1, 11, and 14 (individually, **Tariff**, and collectively, **Tariffs**), as applicable.

**1 Service Description**

1.1 **General Description:** Verizon’s Dedicated SONET Ring (the **Service**) provides the Customer a dedicated high capacity customized network. The network is designed in a ring architecture or topology that assures survivability and is arranged as a full (closed) ring or as a partial ring (such partial ring, the **DSR Partial Ring**). The DSR full ring and DSR Partial Ring are collectively referred to as **DSR**. A complete description of the DSR full ring is set forth in the terms and conditions of the Product Guide (defined below) and a description of the DSR Partial Ring, and its differences from the DSR full ring, is set forth in this Product Schedule.

a. Description of DSR Partial Ring

1. DSR Partial Ring provides connectivity to multiple Customer designated Premises (Nodes) between fiber meet locations at which high speed interconnection of Verizon's backbone network Facilities to the Customer's Facilities or the Facilities of a third party provider occurs. The DSR Partial Ring may only be interconnected to (1) another DSR Partial Ring provided by Verizon or (2) ring Facilities provided by the Customer or third party provider. The portion of the ring provided by the Customer or third party provider must use vendor equipment that matches the equipment used by Verizon and must maintain the same vintage in software release as Verizon. Upon written notice by Verizon, the Customer or third party provider will have sixty (60) days in which to complete the change out of any software release deployed by Verizon.

2. The DSR Partial Ring must have a minimum of two devices (Enhanced Nodes or High-Speed Interfaces) with a device at each fiber meet location and at least one Node on the DSR Partial Ring must be in a CO. When the Partial Ring is provided over an IntelliLight Optical Transport Service (IOTS), the IOTS device(s) are counted towards satisfying the minimum device requirement at each fiber meet location on the DSR Partial Ring. High speed interconnection may occur at a Customer designated Premises, a CO or a location that is mutually agreeable to both the Customer and Verizon (such location will be designated as a Premises for the purpose of administering this schedule).
3. When the fiber meet occurs at a Customer designated Premises, the point of interconnection between Verizon Facilities and the Facilities of the Customer or of a third party provider shall be a Node.
4. When the fiber meet occurs in a CO, high speed interconnection from the device (DSR Node, IOTS Node or IOTS Amplifier, as applicable) occurs at a Collocation arrangement via fiber cross-connects between Verizon's fiber optic Facilities and the Customer's or third party provider's Facilities.
5. When the fiber meet occurs at a mutually agreed upon location, the point of interconnection shall be a High-Speed (Pass-Through) Interface.
6. Verizon's network design will define the optical parameters at the fiber meet locations. Verizon is responsible for the quality and integrity of the high speed optical signal at the fiber meet where its Facilities are interconnected to the Facilities of the Customer or of the third party provider. Verizon bears no responsibility for the optical parameters beyond the fiber meet (i.e., in the Facilities of the Customer or of the third party provider). The Customer or third party provider is responsible for engineering its portion of the jointly provided ring. At their option, Verizon will engineer the Customer or third party provider's portion of the ring within the LATA subject to Additional Engineering as set forth in Section 13.1 of FCC 1 and 11 and Section 8.1 of FCC 16 or Additional Labor Charges as set forth in Section 6 of FCC 14.
7. The Customer must provide Verizon with its fiber optic Facility requirements (i.e., whether it will use single mode fiber or multi-mode fiber) prior to Verizon ordering the necessary SONET network equipment to provide the requested DSR Partial Ring. The Customer may utilize its own fiber optic Facilities or the Facilities of a third party provider.
8. Interconnection to DSR Partial Ring may occur (i) at the Customer designated Premises for which interconnection will occur via a Node; (ii) in a CO for which interconnection from a device will occur at a Collocation arrangement via fiber cross-connects; or (iii) at a mutually agreed upon location where interconnection occurs via a High-Speed (Pass-Through) Interface. Interconnection to other Verizon services may not occur at the mutually agreed upon fiber meet location utilizing a High-Speed Interface.

9. Interconnection to DSR Partial Ring service is limited to high speed fiber interconnection of Verizon's backbone network fiber optic and the fiber optic Facilities of the Customer or of a third party provider.
10. When ordering lower speed channels that originate at and terminate to Nodes which are not within the DSR Partial Ring provided by Verizon, the Customer must provide Verizon with a copy of the order. This order provides Verizon with authority to perform the necessary mapping of the channel through the DSR Partial Ring to ensure continuity of the signal over the jointly provided ring. A Channel Mapping nonrecurring charge will apply for each channel mapped through the Verizon provided DSR Partial Ring. Channel mapping charges do not apply when ordering channels that originate at and/or terminate to Nodes on Verizon's portion of the Partial Ring.
11. The provisioning of DSR Partial Ring is based on negotiated intervals between the Parties.
12. DSR subtending rings are not allowed to interconnect with, or be associated with, a DSR Partial Ring.
13. DSR Partial Ring is not available in a jointly-provided ring arrangement with another local exchange telephone company (as defined by NECA).
14. To the extent not inconsistent with the provisions of this Product Schedule, the Dedicated Sonet Ring Product Schedule (Attachment 13) is incorporated herein by reference. The Dedicated Sonet Ring Product Schedule contains rates and charges for rate elements which are also applicable to DSR Partial Ring. The applicable rate elements include Nodes, Ports and Mileage.

1.2 Product Guide for the Service: To the extent not inconsistent with the provisions of this Product Schedule or the Agreement, the complete description of the Service and all terms and conditions for the Service are contained in the 'DSR Product Guide' (**Product Guide - DSRPGv1033007**) which is incorporated herein by reference and has been provided separately to Customer. The Product Guide contains a comprehensive description of the Service for use by Customer, including without limitation for the following reasons: (i) in connection with its initial review and analysis of the Service; (ii) in making a decision as to whether or not to enter into negotiations for the Service to satisfy its particular business needs; (iii) in maintaining its Service in the most advantageous manner; and (iv) in staying abreast of enhancements or other modifications to the Service.

- 1.3 Changes to the Product Guide: Subject in all respects to the terms and conditions of this Product Schedule and the Agreement, Verizon in its sole discretion shall have the right to change terms set forth in the Product Guide. In accordance with Section 25 (Notices) of the Agreement, Verizon shall provide notice of any change to the Product Guide, and such changed Product Guide shall be the Product Guide as defined herein, and such changed Product Guide shall apply to all existing and new Services provided to Customer pursuant to the Agreement, the Product Guide and this Product Schedule from the date of such change to the Product Guide.

If Verizon makes significant and material changes to the Product Guide without the agreement of Customer and, as a direct result of such changes, Customer's ability to obtain the Services covered by this Attachment 14 are significantly and materially affected, Customer will be permitted to cancel the Services affected by the changes, without further liability.

- 1.4 Tariffed DSR and New Purchases of the Services: The Parties hereby agree as follows:

- (a) *New Purchases of DSR Services*: As of the Product Schedule Effective Date, Customer shall not place any new orders for DSR services which are offered pursuant to the Tariffs (including such services offered pursuant to contract tariff options, individual case basis tariffs, specialized service arrangements, and all other tariffed arrangements) (collectively, **Tariffed Service(s)**). Customer shall place all new orders for the Service pursuant to the terms and conditions of this Product Schedule, the Product Guide and the Agreement.
- (b) *Conversion of Existing Tariffed Service(s) to DSR Services*: Tariffed Service(s) purchased prior to the Product Schedule Effective Date shall, as of the Product Schedule Effective Date, be provided pursuant to the terms of this Product Schedule and the Agreement. At Customer's option, Customer may either: (a) convert its Tariffed Service(s) to DSR Partial Ring under the Agreement with the existing Commitment Period, on the terms and conditions, including the rates and charges, set forth in this Product Schedule and the Product Guide; or (b) convert its Tariffed Service(s) to DSR Service under the Agreement and subscribe to a new Commitment Period of equal or longer length than the Commitment Period for the Tariffed Service, on the terms and conditions, including the rates and charges, set forth in this Product Schedule and the Product Guide.
- (c) *Orders in Progress*: Any orders previously placed under the Tariffs for Tariffed Service(s) shall, as of the Product Schedule Effective Date, be governed by the terms of the Agreement, and Customer acknowledges and agrees that any and all amounts and obligations owed to Verizon on or after the Product Schedule Effective Date for Tariffed Service(s) provisioned or orders placed under Tariff shall be due and owing under this Product Schedule and be governed by the terms and conditions of the Agreement as if such Tariffed Service or orders for Tariffed Service had been provisioned or placed under the Agreement.

**2. Terms and Conditions**

In order for Customer to receive the rates, terms, and conditions for the DSR Partial Ring as set forth in the Agreement, the Product Guide and this Product Schedule, Customer must place the contract number assigned to this Product Schedule in the designated field of all service orders (to include Access Service Requests (ASRs)) submitted in connection with the DSR Partial Ring .

**3. Rates and Charges**

Together with the charges set forth in the Product Guide, the Agreement, the Dedicated Sonet Ring Product Schedule (Attachment 14) or incorporated by reference therein, the rates and charges for the DSR Partial Ring are set forth below.
