2. WAC 480-123-130(1)(b) - Use of Support for Telecommunications Services

The funds received by the Company from the universal communications services program in calendar year 2020 contributed to defrayal of the ongoing operation and maintenance expenses of the Company. These funds are also contributing to the Company's ongoing provision of high-quality basic telecommunications services and the expansion of faster broadband service available to customers residing in the area the Company serves.

In December 2020, the Company received \$91,584 from the universal communications services program for the fiscal year ending June 30, 2021.

During the first six months of 2021, major projects include \$540,000 of capital investment in A-CAM projects to bring faster broadband to more locations. The Company also completed its all-fiber PON network in the City of Asotin in March of 2021 spending \$344,000 during 2021 bringing fiber to the home to 549 households. In addition, the Company has opened \$26,000 of projects to deal with routine capex including drops, cards and mandatory facility moves. The funds received from the universal communications services program can be

viewed as contributing to the Company's ability to perform these projects plus cover normal operating expenses. In the second half of 2021 the Company plans to continue the deployment of the projects mentioned earlier in this paragraph. Details for 2020 expenditures are included in Report 1 of the annual ETC filing submitted on or around July 1.

3. WAC 480-123-130(1)(c) – Use of Support for Broadband Services

Prior to 2020 these locations either had a speed less than 25/3 or were not able to get TDS broadband service). FCC Speed Tier Decoder:

Speed Tier 3 = 10/1
Speed Tier 4 = 25/3
Speed Tier 5 = 25/5
Speed Tier 6 = 100/20
Speed Tier 7 = 100/25

N/A – No other information has been required.

6. WAC 480-123-130(1)(h) – Operational Efficiencies and Business Plan Modifications

The Company is part of a major holding company which results in efficiencies and economies of scale that are not available to most Rural LECs and there are on-going efforts to find more ways to cut costs while improving broadband service and continuing to provide high-quality basic telecommunications services. The funds received from the universal communications services program can be viewed as assisting in the Company's efforts to obtain operational efficiencies.
