

**BEFORE THE WASHINGTON STATE
UTILITIES AND TRANSPORTATION COMMISSION**

In the Matter of the Petition of

TENINO TELEPHONE COMPANY,

Requesting distribution of funds from the
state universal communications services
program created in RCW 80.36.650

DOCKET UT-230619

ORDER 01

GRANTING DISTRIBUTION OF
FUNDS FROM THE STATE
UNIVERSAL COMMUNICATIONS
SERVICES PROGRAM

BACKGROUND

1 On May 13, 2019, the Governor signed Second Substitute Senate Bill (SSSB) 5511, which addresses broadband service issues by: (a) creating the Governor’s State Broadband Office, (b) establishing a broadband grant and loan program administered by the Public Works Board, (c) revising the conditions in which a port district can offer telecommunication services, and (d) extending and revising the purpose of the State Universal Communications Services Program (State USF Program or Program).¹ The State USF Program is primarily intended to provide direct financial support to Washington’s small incumbent Class B Telephone companies that have adopted a plan to provide, enhance, and maintain broadband services in high-cost rural areas of Washington.²

¹ RCW 80.36.650(1) provides that “The purpose of the program is to support continued provision of basic telecommunications services under rates, terms, and conditions established by the commission and the provision, enhancement, and maintenance of broadband services, recognizing that, historically, the incumbent public network functions to provide all communications services including, but not limited to, voice and broadband services.”

² The legislation described above in (a) through (d) creates other opportunities for broadband expansion in addition to this program.

- 2 The Washington Utilities and Transportation Commission (Commission) is allotted \$5 million for the 2024 program year,³ and it may distribute the \$5 million (less the Commission’s administrative costs) to qualifying companies before June 30, 2024.⁴
- 3 On May 27, 2020, the Commission entered General Order R-598 (Adoption Order) in Docket UT-190437 amending and adopting rules in Chapter 480-123 WAC to reconfigure the State USF Program in accordance with SSSB 5511.⁵
- 4 Paragraph 14 of the Adoption Order states that an “[e]ligible provider may now receive a distribution from the Program if they have adopted a plan to provide, enhance, or maintain broadband services in their service areas.” The Adoption Order and the rule that it adopted establish four different eligibility criteria.⁶ To receive a distribution, a provider must meet at least one of those eligibility requirements and also comply with the prerequisites in WAC 480-123-100.⁷
- 5 A company, accordingly, must include in its petition a broadband plan for maintaining, providing, or enhancing broadband service within the provider’s service area.⁸ It must also provide one of the following:

³ This is the tenth and final year of the program. *See In re Amending WAC 480-123*, Docket UT-190437, Gen. Order R-598, (May 27, 2020) (General Order R-598).

⁴ RCW 80.36.650(2) allows that if less than five million dollars is expended in any fiscal year, the unexpended portion must be carried over to subsequent fiscal years and be available for program expenditures. This fiscal year, \$4,850,000 is available for distribution from the State USF Program.

⁵ The Adoption Order established minimum standards of 25 megabits per second download and 3 megabits per second upload (25/3 Mbps) for service to be considered high-speed broadband for the purpose of the State USF Program.

⁶ General Order R-598 at 4-7¶¶ 16-22; WAC 480-123-110(1)(j)(i)-(iv).

⁷ WAC 480-123-100 sets forth various criteria for requesting program support for wireline, wireless, and other communications providers. Wireline communications providers must: (a) be local exchange companies that serve fewer than 40,000 access lines within the state, (b) be an incumbent local exchange carrier, (c) offer basic residential and business telecommunications services, (d) have an established plan to provide, maintain, or enhance broadband service, and (e) be designated by the Commission as an ETC for the purposes of receiving federal universal service support.

⁸ To the extent applicable, a company’s broadband plan to provide, maintain or enhance service should include:

- (i) A multiyear investment plan;

- 1) An unsworn statement made by a company officer certifying that the provider commits to the deployment of broadband to the number of locations the Commission has determined by order. Such deployment obligations are in addition to any Federal Communications Commission deployment requirements. Additionally, a provider that elects to petition the program for support under this category is subject to review of its rate of return and financial reporting requirements;
- 2) An unsworn statement by a company officer certifying that the provider commits to the deployment of broadband to the number of locations the Commission has determined by order. Such deployment obligations are in addition to any Federal Communications Commission deployment requirements;
- 3) An unsworn statement by a company officer certifying that the provider has already met the Federal Communications Commission's total deployment obligations associated with federal high-cost program support as of the date of the petition, and that, since January 1, 2018, the provider has deployed broadband to the number of locations the Commission has determined by order. If a company has deployed broadband to a number of locations less than the number required by Commission order, the company must certify that it will deploy broadband to the remaining number of locations; or
- 4) An unsworn statement by a company officer certifying that broadband service is available to 100 percent of locations within the provider's service area, and that the company commits to making broadband service available to any new locations.

(ii) Specific project(s) that are projected to provide or enhance broadband services at speeds required by the Commission or the Federal Communications Commission. Project information should include an estimated timeline, geographic location, number of locations passed, and upload and download speeds;

(iii) A plan for maintenance of broadband services in the provider's service area;

(iv) A description for how the provider will enhance broadband services in its service area; and

(v) Any supporting information that the Commission requests to assist its review and analysis of the provider's broadband plan.

6 On June 26, 2023, Tenino Telephone Company (Tenino or Company) filed its State USF compliance report, and filed a revised report on August 1, 2023.⁹ In the report, Tenino states that it incurred repairs and maintenance expenses necessary to maintain the existing infrastructure. In addition to these typical expenses, Tenino continued to construct fiber optic-based broadband infrastructure capable of 25/3 Mbps or faster to 210 locations in 2022. During the first six months of 2023 Tenino built fiber infrastructure to 110 locations. The company plans to continue its fiber optic-based broadband build out to an additional 297 locations by the end of 2023. Based on Commission Staff's (Staff) review and several conversations with the company, Staff believes the report meets the requirements of WAC 480-123-130.

7 Tenino filed its petition seeking State USF support under criteria three on July 28, 2023, and it filed a revised broadband plan on September 13, 2023. In its broadband plan, Tenino states that it will deploy fiber optic-based broadband with speeds up to symmetrical 200 Mbps to an additional 104 locations by the end of the current fiscal year and 177 locations by the end of 2024. Tenino will continue investing and placing fiber backbone to alleviate congestion and provide capacity for future growth. The company states that it will continue to incur and pay operational expenses associated with its voice and broadband network. These expenses include, but are not limited to, equipment maintenance and support contracts with equipment and software vendors, performance testing, repair and replacement of cable and wire facilities, maintaining and repairing back-up power sources and locating underground facilities, removing plant growth, and ALIT testing which analyzes cable facilities for indication of trouble or poor performance.

8 Staff reviewed Tenino's Petition, supporting exhibits, including a broadband plan, and believes that the Company meets the prerequisites for requesting program support set forth in WAC 480-123-100 and the third eligibility criterion. Overall, Staff finds that Tenino certified its commitment to deploy broadband services to the number of locations in the Adoption Order,¹⁰ in addition to any locations required by the Federal Communications Commission (FCC). Furthermore, the Company provided a broadband plan to enhance broadband services to areas it does not currently serve 25/3 Mbps. Staff

⁹ Tenino's revised compliance report includes revised availability and subscribership language.

¹⁰ Each company has a specific UTC Deployment Obligation based on its cost benchmark and the amount of anticipated support each company is potentially eligible to receive through June 30, 2024. For these calculations, Staff calculated that \$4,850,000 would be available annually for fiscal years 2022-2024.

recommends the Commission find the Company eligible for State USF Program support in the amount of \$239,345 to be disbursed no later than December 31, 2023.

DISCUSSION AND DECISION

9 We agree with Staff that Tenino has demonstrated its eligibility for a distribution from the State USF Program for fiscal year ending June 30, 2024.

10 The Company has certified it meets the FCC's total deployment obligations associated with federal high-cost support as of the date of the petition and that since January 1, 2018, it deployed broadband to the locations stated in the Adoption Order. The Company has shown in its compliance report the ability to provide and maintain services. Furthermore, Tenino has provided a broadband plan to maintain current services while continuing to deploy broadband service throughout their service area. The Company committed in its petition to deploy broadband services, continue maintenance, and enhance its services.

11 We find that a distribution in the amount of \$239,345 from the State USF Program is in the public interest, consistent with the purposes underlying the regulation and applicable statutes, and should be granted.

FINDINGS AND CONCLUSIONS

12 (1) The Commission is an agency of the State of Washington vested by statute with the authority to regulate public service companies, including local exchange companies.

13 (2) Tenino is a local exchange company as defined in WAC 480-120-021 and a public service company subject to Commission jurisdiction.

14 (3) Tenino has certified it meets the FCC's total deployment obligations associated with federal high-cost support as of the date of the petition and that since January 1, 2018, it deployed broadband services to the number of locations required by the Commission's Adoption Order in Docket UT-190437.

15 (4) Tenino has provided a broadband plan to maintain current services while continuing to deploy broadband service throughout their service area.

- 16 (5) Tenino is eligible to receive funding from the State USF Program in the amount of \$239,345 to be disbursed no later than December 31, 2023.

ORDER

THE COMMISSION ORDERS:

- 17 (1) Tenino Telephone Company's request for funds from the State USF Program for fiscal year ending June 30, 2024, in the amount of \$239,345 is granted.
- 18 (2) The funds will be disbursed by December 31, 2023.
- 19 (3) The Commission retains jurisdiction over this matter for purposes of effectuating this order.

DATED at Lacey, Washington, and effective November 22, 2023.

WASHINGTON UTILITIES AND TRANSPORTATION COMMISSION

DAVID W. DANNER, Chair

ANN E. RENDAHL, Commissioner

MILTON H. DOUMIT, Commissioner
