

# NO OIL TRAIN ROAD CLOSURES!

Dear Chairman Danner, Washington Utilities and Transportation Commission and Whatcom County:  
 PLEASE DON'T ALLOW MORE ROAD CLOSURES TO ACCOMMODATE LEAKY AND DANGEROUS OIL TRAINS. The closure of Valley View Road proposed by BNSF appears unnecessary and raises several community and environmental concerns, including the following: this project is part of piecemealing with several other BNSF and oil refinery projects and violates the SEPA process, this road closure would impact emergency response times and parked trains on the railway may increase contamination on rail tracks and pollution to local waterways, including salmon-bearing streams, as well as air pollution of idling trains.
