

Docket UT-140597
CenturyLink's Responses to Data Requests 1-53
May 30, 2014

RS-39. Outage System Report filed April 24, 2014, Docket UT-140597 "CenturyLink's 911 Major Outage Report-4/10/2014 Next Generation 911 System." Paragraph 7 a "it is not theoretically possible to exhaust the threshold ranges." Please define "theoretically possible" in detail.

Response: The threshold counter is increased each time a PSAP CAMA trunk is utilized. The current threshold range was moved from millions to billions. Intrado is actively monitoring the counter and will re-set as needed until the threshold range is no longer part of the architecture; architecture changes are scheduled for later in the year.

Respondent: Intrado
