TNs were reserved for this CCNA/PON in pre-order either manually or using IMA, the service address on the LSR must match the service address LSR. \\
Product 6: \\
For V, Z not required when going from Co-Provider INP to Co-Provider INP When going from Qwest Resale to Co-Provider, INP required for numbered addresses. For D, C, R, the whole service address is optional because Qwest no longer has an end user account. \\
Products 15, 16, 34 : \\
This entry will be used to support validating the ownership of the current Qwest account. If the entry is longer than 25 characters, then recap the total street name in the REMARKS field.

Required for unnumbered addresses (SANO (Field 11) is not populated for unnumbered addresses), otherwise not applicable. If the Address Not Validated flag, ANV (Field 8a), is set to ' Y ' and the address is unnumbered, then this field is optional. \\
Product 6: \\
For \(V\) and \(Z\) it is not required when going from Co-Provider INP to CoProvider INP. When going from Qwest Resale to Co-Provider, INP required for unnumbered addresses. For Dand C the whole service address is optional because Qwest no longer has an end user account.

This field identifies the desired frame due time when frame work is \\
required. If "Coordinated Hot Cut" ( \(\mathrm{CHC=}=\mathrm{Y}\) ) is requested, a desired \\
DFDT is required. \\
Products 5, 6, 7:
The DFDT indicates the expected start time of the port. This entry represents the meet time at the Central Office for those Co-Providers who do their own central Office wiring. This is the time that the Qwest tech and Co-Provider tech will meet at the Central Office. Co-Providers may select a frame due time (FDT) from 7 a.m. - 7p.m CDT without additional charges. \\
Product 6: \\
A FDT outside of these is considered an out of hour's cut and appropriate
charges apply. Product 10: \\
