

UT-100820, CenturyLink-Qwest Merger Approval Order, Condition 12:

CenturyLink will provide to Commission Staff and Public Counsel on the first anniversary of the Transaction's close, a status report on CenturyLink's switching infrastructure in the state, which will identify any switch replacements, upgrades or retirements made in the prior calendar year as well as any that are known for the upcoming calendar year.

Washington Switching Infrastructure Status Report

(regarding all CenturyLink affiliates)

2011

In 2011, a software version upgrade was installed in a Seattle Main DMS 200 Tandem Switch (STTLWA061GT). This upgrade to the ninth version (SN09) of the manufacturer's software was installed on 8/18/11.

In 2011, a software version upgrade was installed in a Spokane Riverside DMS 100/200 Tandem Switch (SPKNWA01DS1). This upgrade to the ninth version (SN09) of the manufacturer's software was installed on 3/29/11.

In 2011, a DMS 100 switch (TACMWAFADS1) was retired. This retirement took place on 2/17/11.

2012

At this time, no switch replacements, upgrades or retirements are anticipated in Washington during 2012.
