Subject: Public Comment Docket T-101661

March 25, 2011

Please Docket: T-101661 Public Comment

Commissioners:

It is my understanding that you are revoking the ability of the airport shuttles to recover some of the increased expense of spiking fuel costs. Every other transportation provider I can think of adds fuel surcharges in times of higher oil prices. My options when traveling to Washington are airport shuttles or rental cars. A rental car that I would use for the same purpose as the shuttle typically costs \$150-200 versus around \$60 for the shuttle. Plus with the rental car I get to drive in hours of traffic and pay for parking. I do not understand you're rational or reasoning, a cost is a cost and to me the shuttles are by far my best and lowest cost option. Please do not jeopardize this service by your actions, you won't be helping me.
