Re: Request for safety rating upgrade by America's Elite Inc.

On February 8, 2016 America's Elite Inc. submitted to the Utilities and Transportation Commission (UTC) a request for upgrade to its safety rating. The request included a safety management plan that provides a detailed description of the corrective actions taken to address each specific violation discovered during a February 2016 compliance review investigation and outlines how the company will stay in compliance with each requirement in the future.

Your request for upgrade has been reviewed and approved. Your safety rating is now satisfactory. Additionally, since your safety rating has been upgraded to satisfactory, the commission will be upgrading your provisional permit status to permanent.

For any questions regarding this matter, please contact David Pratt at 360.664.1100 or DPratt@utc.wa.gov.

Sincerely,

A handwritten signature in black ink that reads "David Pratt".

David Pratt,
Assistant Director for Transportation Safety
