

**EXHIBIT BJJ-59 TO THE
DIRECT TESTIMONY OF
BONNIE J. JOHNSON
ON BEHALF OF
INTEGRA TELECOM**

Announcement Date: April 7, 2009
Effective Date: Immediately
Notification Number: SYST.04.07.09.F.06245.CTG_NewApp_On_Hold
Notification Category: Systems Notification
Target Audience: CLECs, Resellers
Subject: CMP - Common Ticketing Gateway (CTG) 1.0 - New Application to Application Interface Implementation Placed On HOLD
Associated CR # or System Name and Number: CTG Release 1.0 Qwest CR# SCR121608-02

Effective April 7, 2009, the proposed development and implementation of the Qwest Common Ticketing Gateway (CTG) 1.0 has been indefinitely placed on HOLD. The implementation date for this project was targeted for September 28, 2009. At this time, Change Request SCR121608-02, Introduction of CTG (Common Ticketing Gateway) application to application, and the related Change Request SCR121608-01, Retirement of MEDIACC, will be placed in a Deferred status.

On December 31, 2008, Qwest sent an initial system release notification SYST.12.31.08.F.05938.CTG_IntrfceNewApplmpPI to introduce the Common Ticketing Gateway (CTG) 1.0 Preliminary Release information. The implementation plans for CTG were to follow a phased approach of a replacement for Mediated Access Electronic Bonding Trouble Administration (MEDIACC) which is the application to application electronic gateway used primarily to mechanically process telephone or circuit repair activities. The proposed initial functionality for CTG included:

- Providing an effective mechanism to automate communication and the processing of trouble ticket information
- Implementing electronic trouble ticketing capabilities with Qwest for the exchange of Trouble Ticket information for various Qwest products and services purchased by the customer
- Providing an electronic bonding facility that enables Qwest customers to use their own repair/ticketing system to manage troubles on their Qwest products and services.

The benefit of this new application was to allow Qwest and Wholesale customers the use of a more advanced type of technical communication based on internet standard protocols and web services and telecommunications industry standard markup languages.

When a revised implementation date for CTG has been identified, Qwest will provide appropriate system notification.

Further information about both Change Requests is available on the Wholesale Web site at URL <http://www.qwest.com/wholesale/cmp/changerequest.html>.
