

I have reviewed the information filed in this docket, including the Staff Investigation materials appended to the proposed settlement agreement. I do not find documentation supporting the representation that PSE's revenue from the PSE Connections practices was \$95,000. Perhaps I have missed it.

Please point me to supporting information for the representation. Please also clarify that my inference is correct that the \$95,000 represents total revenues PSE received as a result of the program, over the total life of the program.

If the requested information is not in the materials submitted, please state the correct revenue figure and its origins (it is unnecessary to provide underlying information so long as counsel represent the truth of the information that is provided).

If my understanding is incorrect, and \$95,000 represents only a portion of the total PSE revenues resulting from the program, please state what the grand total is, and also what the total PSE revenues were for the two-year period included in the complaint.

Thanks you.
