**Subject:** Meeting Input

Hi Betty,

The way it looks at this moment, I will not be able to attend the Meeting. But, who knows what will happen before tomorrow morning.

Here is some input for the Stakeholder's Meeting:

1. Packing Charges and Container Prices Items 195, 195A and 225. There is a discrepancy in the prices. One is for Packing the Containers is almost equal to the charges for the containers. Example: drum, dish-packs \$10.08 carrier pack; drum, dish-pack container only \$10.05.
2. Crating (same sections) One can not obtain the necessary materials for the prices quoted.

I would suggest something like:

Exact cost of materials plus a markup of *[Minimum XX% - Maximum XX%]* in addition to labor listed in Item 235 (Labor Charges) for assembly. The receipts for the required materials or third party service, will be maintained with the carriers original Bill of Laden.

Thank you,

Sam Rickard
