Original Sheet 91

**FACILITIES FOR INTRASTATE ACCESS**

---

2. GENERAL REGULATIONS (Cont'd)

2.7 FIA Services Provided By More Than One Telephone Company (Cont'd)

2.7.3 Meet Point Billing (Cont'd)

(C) Meet Point Billing Mileage Calculation

Each Telephone Company's portion of the Switched Transport and/or Special Transport mileage will be determined as follows:

- (1) For Switched Access Tandem-Switched Transport Services, determine the appropriate Tandem-Switched Transport - Facility total miles by computing the number of miles from the wire center that normally serves the CDL, or the access tandem if Direct-Trunked Transport is ordered directly to the access tandem, to the serving wire center in the Access Area (i.e., end user serving wire center, or WATS Serving Office), using the V&H method as described in the NECA Tariff FCC No. 4. For Special Access Service and Switched Access Direct-Trunked Transport determine the appropriate Special Transport or Direct-Trunked Transport total miles by computing the number of miles between the serving wire centers involved (i.e., CDL serving wire center, Hub wire center, WATS Serving Office) using the V&H method as described in the NECA Tariff FCC No. 4. Where the calculated miles includes a fraction, the value is rounded up to the next full mile.
- (2) Determine the billing percentage (BP), as described in the NECA Tariff FCC No. 4. This represents the portion of the Service provided by each telephone company.
- (3) For Switched Access Tandem-Switched Transport; when Tandem Switched Transport is provided to a terminating carrier different from a Frontier Telephone ILEC Company, Terminating – Tandem 3<sup>rd</sup> party rates are applicable otherwise Terminating –Tandem End Office rates are applicable. When originating Tandem Switched Transport is provided, Originating rates are applicable. To determine the Switched Access Tandem-Switched Transport (a) multiply the number of access minutes of use times the number of airline miles as specified in (1), times the BP of each Telephone Company as specified in (2), times the Tandem-Switched Transport - Facility rate; (b) multiply the Tandem-Switched Transport - Termination rate times the number of access minutes times the quantity of terminations.

(C)

(C)

Example of Billing Percentage (BP) Method Using the Multiple Bill Option:

The Tandem-Switched Transport - Facility between Office X and Office Y is jointly provided by telephone companies A and B. The following example reflects the rate for telephone company A. Rate for telephone company B would appear in its appropriate Access Tariff.
