---

To the Washington Utilities and Transportation Commissioners:

Climate Change is real, happening all around us and everyone needs to combat it. This letter addresses concerns with Puget Sound Energy which is trying to project an identity as a green company but is heading in the wrong direction.

PSE claims to be putting energy into clean power solutions and yet 60% of PSE's energy is generated by coal and liquid natural gas.

I ask you: Why is this the case when we live in a region that has surplus hydropower and resources prime for harnessing wind and solar?

For the future of humanity and our planet, please require PSE to commit to a carbon free future!

Thank you.

Sincerely,

Kathleen Hendrickson
