Section 600 - Functionality in Emergency Situations

Under FCC Rules, an ETC must demonstrate its ability to remain functional in emergency situations. Since Telrite Corporation d/b/a Life Wireless (Telrite) is providing service to its customers through the use of facilities obtained from other carriers, it is able to provide to its customers the same ability to remain functional in emergency situations as currently provided by the carriers to their own customers, including access to a reasonable amount of back-up power to ensure functionality without an external power source, re-routing traffic around damaged facilities, and the capability of managing traffic spikes resulting from emergency situations.

Telrite, along with their underlying carriers, have created back-up systems to ensure functionality in the event of a loss of power or network functionality. Telrite maintains its own diesel-powered backup generator at their switching facility in Georgia. All systems within the facility are implemented on redundant servers, each with redundant data network and power.
