Subject: Regarding UE-160918 and UG-160919
Date: Sunday, January 7, 2018 7:38:48 PM

Dear Commissioners,

It is hard for me to believe that the power company serves our environmentally conscious Puget Sound area gets most of its energy from fossil fuels. Those in charge of managing and directing Puget Sound Energy must be aware of the seriousness of climate change and the effect burning fossil fuels has on it. Please stop it. My family and my business are both customers of yours and we all want this process stopped. It is not healthy for the world we live in or for the world our children will live in. Please move your energy resources to renewable sources such as wind and sun. The faster this is done the better.

Americans have always been willing to sacrifice to achieve their goals. Especially here in the Northwest, we want a cleaner world and are willing to put our money to making that happen. How many years ago did Jimmy Carter advise us to put on a sweater if we are cold. Let's work together to create a safer, cleaner, better world - even if it means we need to sacrifice some. The world is being made by those that step forward into the future. We have a President who believes coal is coming back while China and the rest of the world realize new technology that gathers energy from the sun and the wind are where the world markets are going. They will lead us while America and apparently the Pacific Northwest follow a good distance behind. Too bad.

Why is there even a question about this. It is the right thing to do, so do it!
Why would PSE continue to operate in a manner that is detrimental to the health of your customers and that threatens the world your future customers will inherit

Sincerely,

David Warren
