

I am writing in regards to the moving of PS/ALI away from where it has been managed. Getting notice only 30 days in advance has presented a significant hardship. I am having trouble getting pricing from vendors and making a decision on who to go with. This is a service that I had gotten for free from Centurylink(there may have been a setup fee but that was long ago). The one vendor I have gotten pricing from says that it will be \$500 setup and \$1800/ year. I may only make 30-100 changes a year. This means I would be paying between \$18 and \$60 per change. This is an expense that my non-profit does not need to incur.
