Ms. Carole J. Washburn,
Executive Secretary
Washington Utilities and
Transportation Commission
Chandler Plaza Building
1300 S. Evergreen Park Drive SW
Olympia, Washington 98504

Subject: **INTERCONNECTION AGREEMENT BETWEEN VERIZON NORTHWEST
INC. and MCIMETRO ACCESS TRANSMISSION SERVICES LLC –
AMENDMENT NO. 2.**

Dear Ms. Washburn:

Please withdraw the documents we sent you by a cover letter dated September 10, 2004, with the subject line "Interconnection Agreement Between Verizon Northwest Inc. and MCI Worldcom Communications Inc. – Amendment No. 2," and substitute the documents enclosed with this letter. The previously filed amendment was meant to be between Verizon Northwest and MCIMetro and was signed by those two companies, but the heading, footer and text inadvertently referred to MCI Worldcom.

Enclosed for filing with the Commission are an original and three (3) copies of the second amendment to the interconnection agreement between Verizon Northwest and MCIMetro, plus a completed Commission amendment approval form. Since the parties did not date their signatures on the amendment, at the request of the Commission's Staff we are also enclosing an affidavit stating the date the contract was executed.

Please call me if you have any questions, at 425-261-5006.

Very truly yours,

A handwritten signature in black ink that reads "Richard E. Potter".

Richard E. Potter
Public Policy & External Affairs

Enclosure

BEFORE THE WASHINGTON UTILITIES AND TRANSPORTATION COMMISSION

REQUEST FOR APPROVAL OF FULLY NEGOTIATED AMENDMENT TO INTERCONNECTION AGREEMENT BY:

VERIZON NORTHWEST INC. f/k/a GTE Northwest Incorporated

(Telecommunications Company A Name)

Deleted:

(Company A d/b/a if different from registered name)

MCIMetro Access Transmission Services LLC

(Telecommunications Company B Name)

(Company B d/b/a if different from registered name)

In accordance with WAC 480-07-640, Company A requests approval of the fully negotiated amendment to an interconnection agreement, as described below:

Amendment Number: 2

Description of amendment:

Amendment No. 2 to Interconnection, Resale and Unbundling Agreement (VzNW – AT&T agreement previously adopted by MCIm); concerns line splitting.

The amendment amends the interconnection agreement first approved by the Commission on 12/31/03

in WUTC Docket No. UT- 033063.

Company A represents that the amendment does not discriminate against non-party carriers, that it is consistent with state and federal law, and that it is in the public interest. By virtue of Company B's signature on the amendment, Company A believes that Company B agrees with these representations.

Richard E. Potter is authorized to file amendments to
Dir. PPEA interconnection agreements on behalf of

Verizon Northwest Inc.

AFFIDAVIT OF JEFFREY A. MASONER

BEFORE ME, the undersigned authority, on this 4th day of October, 2004, personally appeared Jeffrey
A. Masoner, who being by me duly sworn on oath deposed and said:

1. My name is Jeffrey A. Masoner. My position with Verizon Communications is Vice President –
Interconnection Services Policy and Planning. In that position, on the 3rd day of September, 2004, I executed
the Amendment No. 2 between MCImetro Access Transmission Services LLC (“MCImetro”) and Verizon
Northwest Inc., f/k/a GTE Northwest Incorporated (“Verizon”). Verizon was the second and final Party to
complete execution of the Amendment No. 2, upon receipt of MCImetro’s execution of Amendment No. 2, on
the 30th day of August, 2004.

Further Affiant sayeth not.

Jeffrey A. Masoner

Sworn to and subscribed to before me this 4th day of October, 2004, to certify which witness my hand and
seal.

Notary Public in and for the Commonwealth of VIRGINIA

My Commission Expires: 9/30/07

AMENDMENT NO. 2

to the

INTERCONNECTION, RESALE AND UNBUNDLING AGREEMENT

between

VERIZON NORTHWEST INC., f/k/a GTE NORTHWEST INCORPORATED

and

MCIMETRO ACCESS TRANSMISSION SERVICES LLC

THIS AMENDMENT No. 2 (this "Amendment") is made this 1st day of July 2004 (the "Effective Date"), by and between Verizon Northwest Inc., f/k/a GTE Northwest Incorporated ("Verizon"), a Washington corporation, with its principal place of business at 1800 41st Street, Everett, Washington 98201, and MCImetro Access Transmission Services LLC ("MCIm"), a Delaware limited liability company, with its principal place of business at 22001 Loudoun County Parkway, Ashburn, VA 20147. (Verizon and MCIm may be hereinafter referred to, each individually, as a "Party" and, collectively, as the "Parties".) This Amendment covers services in the Verizon service territory in the State of Washington (the "State").

WITNESSETH:

WHEREAS, MCIm has previously adopted the terms of the Interconnection, Resale and Unbundling Agreement between Verizon and AT&T Communications of the Pacific Northwest, Inc. ("AT&T") pursuant to Section 252(i) of the Communications Act of 1934, as amended, such adopted terms having been amended by Amendment No. 1 thereto (the adopted terms, as so amended, the "Terms");

WHEREAS, the Parties wish to amend the Terms such that Verizon would make available to MCIm Line Splitting (as defined in Section 1(a) below) pursuant to the terms hereof; and

WHEREAS, the Parties also wish to revise the rates and charges set forth in the Terms, pursuant to the terms hereof.

NOW, THEREFORE, in consideration of the mutual promises, provisions and covenants herein contained, the sufficiency of which is hereby acknowledged, the Parties agree as follows:

1. Amendments to the Terms. Effective as of the date first set forth above, the Terms are amended hereby as follows:

(a) Line Splitting. Subject to the conditions set forth herein, MCIIm may provide integrated voice and data services over the same Loop by engaging in "Line Splitting" as set forth in paragraph 18 of the FCC's Line Sharing Reconsideration Order (CC Docket Nos. 98-147, 96-98), released January 19, 2001. Any Line Splitting between MCIIm and another LEC shall be accomplished by prior negotiated arrangement between those LECs. To achieve a Line Splitting capability, MCIIm, as the voice LEC, may utilize supporting Verizon OSS to order and combine in a Line Splitting configuration an existing, unbundled xDSL Compatible Loop terminated to a collocated splitter and Digital Subscriber Line Access Multiplexer ("DSLAM") equipment provided by its data partner (or itself), unbundled switching combined with shared transport, and cross-connects, under the prices, terms and conditions set forth in the Terms and this Amendment. MCIIm shall provide Verizon with the information required by FCC Rules regarding the type of xDSL technology that it deploys on each Loop facility employed in Line Splitting. Unless the Parties agree otherwise, this information will be conveyed by the Network Channel/Network Channel Interface Code (NC/NCI) or equivalent. MCIIm or its data partner shall provide any splitters used in a Line Splitting configuration. To the extent MCIIm seeks to migrate an applicable, existing UNE configuration (e.g., a UNE-P Combination) to a Line Splitting configuration using the same network elements utilized in the pre-existing UNE arrangement, it may do so to the extent such a migration is addressed by (and in such case consistent with such implementation schedules, terms, conditions and guidelines as are agreed upon for such migrations in) the ongoing DSL Collaborative in the State of New York, NY PSC Case 00-C-0127, allowing for local jurisdictional and OSS differences. Notwithstanding any provision of this Amendment or otherwise, the foregoing Verizon obligations (and MCIIm rights) in connection with Line Splitting shall apply only to the extent Verizon is required to undertake such obligations, and MCIIm has such rights, in each case under both 47 U.S.C. Section 251(c)(3) and 47 C.F.R. Part 51. Without limiting Verizon's rights, if any, pursuant to Applicable Law or any other section of the Terms to terminate its provision of Line Splitting (or applicable network element(s)) and, notwithstanding any other provision of this Amendment or otherwise, if Verizon provides Line Splitting to MCIIm, and the Commission, the FCC, a court or other governmental body of appropriate jurisdiction determines or has determined that Verizon is not required by 47 U.S.C. Section 251(c)(3) or 47 C.F.R. Part 51 to provide such Line Splitting arrangements (or applicable network element(s)), Verizon may terminate its provision of such Line Splitting arrangements (or applicable network element(s)) to MCIIm on prior written notice thereof provided after the relevant determination becomes effective (provided, however, that the number of days' notice shall be the period, if any, prescribed by the Commission, the FCC, a court or other governmental body of appropriate jurisdiction in its determination and, in the absence of a prescribed period, shall be thirty (30) days).

(b) "xDSL" is as defined and used in this Amendment. The small "x" before the letters DSL signifies reference to DSL as a generic industry standard transmission technology, as opposed to a specific DSL "flavor."

(c) Limitations. Notwithstanding anything set forth in the Terms or this Amendment:

(1) Nothing contained in the Terms or this Amendment shall be deemed to constitute an agreement by Verizon that any item identified in the Terms or this Amendment as a network element is (A) a network element under 47 U.S.C. § 251(c)(3) or 47 C.F.R. Part 51, or (B) a network element Verizon is required by 47 U.S.C. § 251(c)(3) or 47 C.F.R. Part 51 to provide to MCIIm on an unbundled basis. Nothing contained in the Terms or this Amendment shall limit Verizon's or MCIIm's right to appeal, seek reconsideration of or otherwise seek to have stayed, modified, reversed or invalidated any order, rule, regulation, decision, ordinance or statute issued by the Washington Utilities and Transportation Commission, the FCC, any court or any other governmental authority related to, concerning or that may affect Verizon's obligations or MCIIm's rights under the Terms, this Amendment or Applicable Law.

(2) Notwithstanding anything set forth in the Terms or this Amendment, Verizon shall be required to provide Line Splitting only where necessary facilities are available; as such, Verizon has not agreed in this Amendment to perform network modifications (routine or otherwise) in connection with provision of Line Splitting (or a network element included as part of a Line Splitting configuration). The Parties reserve their rights to negotiate terms relating to routine network modifications in connection with provision of Line Splitting.

(d) Notwithstanding anything else set forth in the Terms or this Amendment and subject to the conditions set forth in Section 1(c) of this Amendment: Verizon shall provide access to Line Splitting, as well as Unbundled Local Loops, Local Switching Elements, shared transport network elements and other network elements, if any, included as part of a Line Splitting configuration pursuant to the applicable rates and charges set forth in Exhibit A to this Amendment. Exhibit A hereto shall supersede in its entirety the rates and charges set forth in the Terms. The rates and charges set forth in Exhibit A hereto shall apply until such time as they are replaced by new rates and charges as may be approved or allowed to go into effect by the Washington Utilities and Transportation Commission or the FCC from time to time, subject however, to any stay or other order issued by any court of competent jurisdiction for the State of Washington. Both Parties reserve all rights each may have under Applicable Law to challenge, or seek modification, on a prospective basis of the rates and charges set forth in Exhibit A hereto.

2. Conflict between this Amendment and the Terms. This Amendment shall be deemed to revise the terms and provisions of the Terms to the extent necessary to give effect to the terms and provisions of this Amendment. In the event of a conflict between the terms and provisions of this Amendment and the terms and provisions of the Terms, this Amendment shall govern, *provided, however*, that the fact that a term or provision appears in this Amendment but not in the Terms, or in the Terms but not in this Amendment, shall not be interpreted as, or deemed grounds for finding, a conflict for purposes of this Section 2.

3. Counterparts. This Amendment may be executed in one or more counterparts, each of which when so executed and delivered shall be an original and all of which together shall constitute one and the same instrument.

4. Captions. The Parties acknowledge that the captions in this Amendment have been inserted solely for convenience of reference and in no way define or limit the scope or substance of any term or provision of this Amendment.

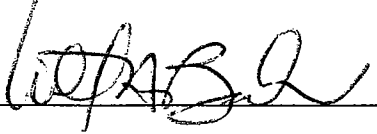

5. Scope of this Amendment. This Amendment shall amend, modify and revise the Terms only to the extent set forth expressly in Section 1 of this Amendment, and, except to the extent set forth in Section 1 of this Amendment, the terms and provisions of the Terms shall remain in full force and effect after Effective Date.

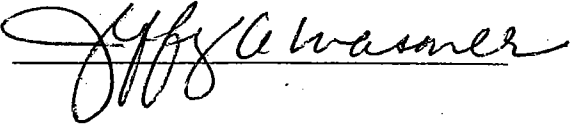

SIGNATURE PAGE

IN WITNESS WHEREOF, the Parties hereto have caused this Amendment to be executed as of the Effective Date.

EXHIBIT A TO AMENDMENT NO. 2¹

I. Rates and Charges for Transport and Termination of Traffic²

A. Reciprocal Compensation Traffic Termination: See Amendment 1 to the Agreement.

B. The Tandem Transit Traffic Service Charge is **\$0.0047337 per minute of use.**

Transit Service Billing Fee – Five percent (5%) of the Tandem Transit Traffic Service Charges assessed during the billing period for Tandem Transit Traffic exchanged with the relevant third party carriers.

Transit Service Trunking Charge (for each relevant third party carrier) – For each DS1 equivalent volume³ (or portion thereof) of Tandem Transit Traffic exchanged with the relevant third party carrier during a monthly billing period: an amount equal to the total monthly rate for 24 channels (DS1 equivalent) for Switched Access, Access Tandem Dedicated Trunk Port DS1, as set forth in Verizon Tariff FCC No. 14, as amended from time to time.

C. Entrance Facility and Transport for Interconnection Charges: See Amendment 1 to the Agreement.

¹ Nothing in this Exhibit A shall be deemed to require Verizon to provide an unbundled network element (or combination thereof), a service, a facility or an arrangement that Verizon is not required to provide under the Agreement or the Amendment.

² All rates and charges specified herein are pertaining to the Interconnection Attachment, as amended by Amendment 1 to the Agreement.

³ A CCS busy hour equivalent of 200,000 combined minutes of use.

Ø WN – U18

II. Services Available for Resale

The avoided cost discount for all Resale services except Operator Services/Directory Assistance (OS/DA) is 10.1%. The avoided cost discount for OS/DA, is 0.6%.

Non-Recurring Charges (NRCs) for Resale Services

+++++ Applicable to electronic and manual orders.

[•] Service Order Charges for Manual and Semi-Mechanized Ordering will apply in addition to Operation Support Systems (OSS) and National Open Market Center (NOMC) Charges.

Application of NRCs

Pre-ordering:

CLEC Account Establishment is a one-time charge applied the first time that MCI orders any service from this Agreement.

Customer Record Search applies when MCI requests a summary of the services currently subscribed to by the end-user.

Ordering and Provisioning:

Engineered Initial Service Order - New Service applies per Local Service Request (LSR) when engineering work activity is required to complete the order, e.g. digital loops.

Non-Engineered Initial Service Order - New Service applies per LSR when no engineering work activity is required to complete the order, e.g. analog loops.

Initial Service Order - As Specified (Engineered or Non-Engineered) applies only to Complex Services for services migrating from Verizon to MCI. Complex Services are services that require a data gathering form or has special instructions.

Non-Engineered Initial Service Order - Changeover applies only to Basic Services for services migrating from Verizon to MCI. End-user service may remain the same or change.

Central Office Connect applies in addition to the ISO when physical installation is required at the central office.

Outside Facility Connect applies in addition to the ISO when incremental fieldwork is required.

Manual Ordering Charge applies to orders that require Verizon to manually enter MCI's order into Verizon's Secure Integrated Gateway System (SIGS), e.g. faxed orders and orders sent via physical or electronic mail.

Custom Handling (These NRCs are in addition to any Preordering or Ordering and Provisioning NRCs):

Service Order Expedite (Engineered or Non-Engineered) applies if MCI requests service prior to the standard due date intervals.

Coordinated Conversion applies if MCI requests notification and coordination of service cut over prior to the service becoming effective.

Hot Coordinated Conversion First Hour applies if MCI requests real-time coordination of a service cutover that takes one hour or less.

Hot Coordinated Conversion Per Additional Quarter Hour applies, in addition to the Hot Coordinated Conversion First Hour, for every 15-minute segment of real-time coordination of a service cut-over that takes more than one hour.

WN U-21, Section 5, Verizon Northwest Inc.

UNE-P Pricing

MRCs. The MRC for a UNE-P will generally be equal to the sum of the MRCs for the combined UNEs (e.g., the total of the UNE loop charge plus the UNE port charges in the Agreement (see Note A) plus: UNE local switching (per minute originating usage plus T/O factor to determine terminating minutes) based on UNE local switching rates in the Agreement plus UNE shared transport and tandem switching (based on factors for percent interoffice and tandem switch usage, plus assumed transport mileage of 10 miles and 2 terms) based on UNE shared transport rates in the Agreement plus UNE Vertical Services charges (optional per line charges, if allowed by the Agreement).

(Note A): UNE platforms are available in four loop/port configurations as shown below. If the price for any component of these platforms is not set forth herein, Verizon will use the ICB process to determine the appropriate price and TBD pricing shall apply.

UNE Basic Analog Voice Grade Platform consists of the following components:
UNE 2-wire Analog loop; and
UNE Basic Analog Line Side port

UNE ISDN BRI Platform consists of the following components:
UNE 2-wire Digital loop; and
UNE ISDN BRI Digital Line Side port

UNE ISDN PRI Platform consists of the following components:
UNE DS1 loop; and
UNE ISDN PRI Digital Trunk Side port

UNE DS1 Platform consists of the following components:
UNE DS1 loop; and
UNE DS1 Digital Trunk Side port

NRCs. Optional NRCs will apply as ordered by the CLEC including such charges as Expedites, Coordinated Conversions, loop Conditioning, etc.

EEL Pricing

MRCs. The MRCs for an EEL will generally be equal to the applicable MRCs for UNEs and Multiplexing that comprise an EEL arrangement (e.g., UNE Loop, IDT, CDT, Multiplexing, and Clear Channel Capability).

NRCs. The NRCs that generally apply to an EEL arrangement are applicable ordering and provisioning charges for EEL Loops, IDT, CDT, Multiplexing and Clear Channel Capability.

Line Splitting ⁵

Except as noted in the following paragraph, the provider of voice services in a Line Splitting arrangement ("VLEC") will be billed for all charges associated with the Network Elements and other Verizon services, facilities and arrangements, used in conjunction with the Line Splitting arrangement ("Line Splitting Arrangement"), regardless of which CLEC in the Line Splitting Arrangement orders the Network Elements or other Verizon services, facilities or arrangements. These charges include, but are not limited to, all applicable non-recurring charges and monthly recurring charges related to such Line Splitting Arrangement, including but not limited to UNE-P (2-wire digital UNE loop or 2-wire ADSL capable UNE loop, UNE switch port, UNE local switching usage, UNE local transport and usage rates), testing, pre-qualification, OSS, line conditioning, CLEC account establishment and misdirected trouble charges.

The CLEC with the applicable collocation arrangement will be billed for splitter establishment and collocation related charges.

⁵ Rates for the individual line splitting components are contained in existing terms for Unbundled Network Elements and Collocation.
Verizon WA/MCI Amendment No. 2 Exhibit A Line Splitting Amendment 07/01/04

[⊕] WN U-21, Section 5, Verizon Northwest Inc.

Application of NRCs

Preordering:

CLEC Account Establishment is a one-time charge applied the first time that MCI orders any service from this Agreement.

Customer Record Search applies when MCI requests a summary of the services currently subscribed to by the end-user.

Ordering and Provisioning:

Initial Service Order (ISO) applies to each Local Service Request (LSR) and Access Service Request (ASR) for new service. Charge is Manual (e.g. for a faxed order) or Semi-Mechanized (e.g. for an electronically transmitted order) based upon the method of submission used by the CLEC.

Subsequent Service Order applies to each LSR/ASR for modifications to an existing service. Charge is Manual or Semi-Mechanized based upon the method of submission used by the CLEC.

Advanced ISO applies per LSR/ASR when engineering work activity is required to complete the order.

Exchange ISO applies per LSR/ASR when no engineering work activity is required to complete the order.

Provisioning – Initial Unit applies per ISO for the first unit installed. The Additional Unit applies for each additional unit installed on the same ISO.

Basic Provisioning applies to services that can be provisioned using standard network components maintained in inventory without specialized instructions for switch translations, routing, and service arrangements.

Complex Provisioning applies to services that require special instruction for the provisioning of the service to meet the customer's needs.

Examples of services and their Ordering/Provisioning category that applies:

Exchange-Basic: 2-Wire Analog, 4-Wire Analog, Standard Sub-Loop Distribution, Standard Sub-Loop Feeder, Drop and NID.

Exchange-Complex: Non-loaded Sub-Loop Distribution, Non-load Sub-Loop Feeder, Loop Conditioning, Customized Routing, ISDN BRI Digital Line Side Port and Line Splitting.

Advanced-Basic: 2-Wire Digital Loop, 4-Wire Digital Loop

Advanced-Complex: DS1 Loop, DS3 Loop, Dark Fiber, EELs, and ISDN PRI Digital Trunk Side Port

Conditioning applies in addition to the ISO, for each Loop or Sub-Loop UNE for the installation and grooming of Conditioning requests.

DS1 Clear Channel Capability applies in addition to the ISO, per DS1 for the installation and grooming of DS1 Clear Channel Capability requests.

Changeover Charge applies to UNE-P and EEL orders when an existing retail, resale, or special access service is already in place.

Service Inquiry – Dark Fiber applies per service inquiry when a CLEC requests Verizon to determine the availability of dark fiber on a specific route.

Custom Handling (These NRCs are in addition to any Preordering or Ordering and Provisioning NRCs):

Service Order Expedite applies if MCIIm requests service prior to the standard due date intervals and the expedite request can be met by Verizon.

Coordinated Conversion applies if MCIIm requests notification and coordination of service cutover prior to the service becoming effective.

Hot Coordinated Conversion First Hour applies if MCIIm requests real-time coordination of a service cutover that takes one hour or less.

Hot Coordinated Conversion Per Additional Quarter Hour applies, in addition to the Hot Coordinated Conversion First Hour, for every 15-minute segment of real-time coordination of a service cut-over that takes more than one hour.
