	Larry Southern	E-mail	<p>Dear UTC,</p> <p>A 6.1% proposed rate increase by PacifiCorp to go into effect on January 1, 2021, during a pandemic, sure doesn't sound like best business practices. Therefore, I oppose the proposed rate increase.</p> <p>Respectfully submitted,</p> <p>Larry Southern</p>
	Robert E. Swope	Phone	<p>My message concerns the notice of proposed rate change for Pacific Power. I strongly urge the Commission to not grant this increase. this is a very very poor time for the power committee uh power commission to raise rates on consumers. Rates are more than adequate, compensation is more than adequate. Please do not grant this request.</p> <p>Thank you very much.</p>
	Linda Miller	E-mail	<p>I can't see how this is necessary at this time. People are out of work and will not be able to afford any amount of rate increase. This request needs to be tabled until the corona virus is gone or at least not a threat to human life. Your timing is extremely insensitive. My answer is "NO".</p> <p>Sincerely, Linda Miller</p>
	Dennis Hambek	Web	<p>UE-191024</p> <p>I am just wondering if they have ever declined a rate increase. The main concern is the basic charge of \$7.75 to \$9.50. Cascade Natural Gas gets \$5 for a basic fee why does Pacific Power get \$9.50. The increased basic fee is pure profit for the company. We don't have a choice for our light company and we have to use whoever is in our area. There is currently a virus and people are strapped and this is asinine. The company should not be gaining profits while its customers are struggling financially.</p>

	Robert E Swope	Web	I strongly suggest that the Commission does not approve the request for an increase of Pacific Power of 29.8 million dollars or 8.5 percent increase. During this period of extreme economic turbulence I remain convinced that Pacific Power has sufficient income. Please do not approve their request.
	Judy R Champion	Web	In reference to Docket UE-191024 Strongly Oppose to proposed rate increase
	Lottie Voller	Web	I am against first of all the basic charge. The basic charge is already too high and outrageous. This is outrageous and Cascade Natural Gas Basic charge is only \$5. Why does Pacific Power get to raise rates when they have more customers. The volume of customers that Pacific Power has should prevent them from raising this rate, I am really upset. I am against the proposed rate increase of 6.1 percent. I am against the raises across the board.
	tracy janosik	Web	There are so many people having a hard time in this country so this is a horrible time to increase rates. An increase of 8.5% is way too high! Yakima already has very expensive rates which are hard to pay especially during winter months. Please reconsider this. Thank you
