DAVID J. LANDERS

ON BEHALF OF PUGET SOUND ENERGY

SEPTEMBER 18, 2024

BEFORE THE WASHINGTON UTILITIES AND TRANSPORTATION COMMISSION**Dockets UE-240004 & UG-240005
Puget Sound Energy
2024 General Rate Case****JEA DATA REQUEST NO. 051:****Re: Decarbonization**

Please refer to Landers Direct, Exh. DJL-1Tr, 33: Table 6: Programs included in customer and public safety investment categories. Please identify the expected annual emissions reductions for each year through 2050.

Response:

Puget Sound Energy (“PSE”) objects to JEA Data Request No. 051 as overbroad, unduly burdensome, and not reasonably calculated to lead to the discovery of admissible evidence as it requests to provide annual emissions data through 2050, which effectively conflates the Decarbonization Study and rate plan programs. Notwithstanding these objections, and subject thereto, PSE responds as follows:

PSE has provided the expected emissions reduction for 2025 and 2026 rate years in this GRC. Please see the table below for expected emissions reductions for the customer and public safety investment category during the rate plan.

	Expected Emissions Reduction (MTCO_{2e}¹)
2025	2,383
2026	2,506

Expected annual emissions reductions during the rate plan for specific programs in the customer and public safety investment category are provided in the Second Exhibit to the Prefiled Direct Testimony of David J. Landers, Exh. DJL-3, in tables 10, 12, 14, 18, and 20 found on pages 23 through 48.
