

Cascade Natural Gas Corporation
2020 Customer Service Quality Report

- a) ***Cascade will separately report the number of customer complaints (i) received by Cascade and (ii) filed with the Commission***

There were 175 customer calls escalated to Customer Service Team Leaders and seven complaints filed with the Commission.

- b) ***Cascade will report the average time from a customer call to the arrival of field technicians in response to a gas emergency.***

The average time from when the call was received until the emergency order was placed was 4 minutes 50 seconds, and the average response time by the technician was 26 minutes 23 seconds. Total average time from a customer call to the arrival of a field technician was 31 minutes 13 seconds.

- c) ***Cascade will report the number of missed customer appointments. A customer appointment is defined as a mutually agreed appointment time between a customer and Cascade for service to be provided either when the customer needs to be present or when the customer needs not be present. A missed customer appointment occurs when Cascade fails to keep a customer appointment.***

There were zero missed appointments.

- d) ***Cascade will separately report the percentage of customer disconnects due to non-payment for (i) residential customers (schedule 503) and (ii) commercial customers (schedule 504).***

The percentage of disconnects for non-payment is .14% for residential customers and .11% for commercial customers.

- e) ***For calendar year 2020, Cascade will report the percentage of calls answered live within sixty (60) seconds by its customer call center. For calendar year 2020, Cascade will report the percentage of calls answered live within fifty (50) seconds by its customer call center. For calendar year 2020, Cascade will report the percentage of calls answered live within forty (40) seconds by its customer call center.***

In 2020, there were 257,335 calls to the customer call center for Cascade. Of those, 63.89% were answered in 60 seconds or less, 62.51% were answered in 50 seconds or less and 61.07% were answered in 40 seconds or less.
