PO Box 308  
Stehekin WA, 98852*

UTC staff,

On May 23<sup>rd</sup> it was ordered that Backcountry Travels LLC submit an update every six months on the procurement of docking facilities.

The dock in Stehekin is managed by the National Park Service (NPS). Backcountry Travels LLC has been granted commercial use authorization (CUA) to use these facilities. The fee has been paid and the CUA paperwork is signed and sent back to the NPS.

The dock at Fields Point landing is managed by the U.S. Forest Service. Backcountry Travels LLC has applied for a CUA to use this facility. This application has been approved however official permission has not been finalized. Assistant district ranger Paul Willard is handling our application and has assured me that the CUA will be finalized in time to initiate service. Permission has already been officially granted to train at Fields Point.

Sincerely,

Colter Courtney

Backcountry Travels LLC Managing member
