Confidentiality

Ecology does not publish individual company reports. Instead, we compile information from all surveys, then report material amounts for the entire state. If your firm desires confidentiality in the event of a public request for information, please refer to the procedure below.

Chapter 43.21A.160 RCW states: "Whenever any records or other information furnished under the authority of this chapter to the director, the department, or any division of the department... may affect adversely the competitive position of such owner or operator if released to the public or to a competitor, the owner or operator of such processes or production may so certify, and request that such information or records be made available only for the confidential use of the director, the department, or the appropriate division of the department." The director will review the request, and if doing so would not be detrimental to the public interest and is otherwise within accord with the policies and purposes of the RCW, may grant the confidentiality.

If you want to request confidentiality of your firm's recycling survey forms for 2009, write a letter to the director of the Department of Ecology explaining how, if the information was released, it could adversely affect your business. Address the letter to Ted Sturdevant, Director, Department of Ecology, PO Box 47600, Olympia, WA 98504-7600.
