RE: Docket PG-040210 Puget Sound Energy – 2004 Standard Inspection for Thurston & Lewis Counties; Processes for Inspecting and Remediating Atmospheric Corrosion

Dear Mr. Rathbun:

PSE had committed in a letter dated October 4, 2005 to provide copies of processes for inspecting and remediating atmospheric corrosion on locations that are difficult to access due to location. Attached please find a copy of these processes.

PSE plans to review these processes with Staff during their follow-up inspection which is scheduled for later this month. If Staff has any questions in the interim, please feel free to contact me at 425-462-3957.

Sincerely,

Jim Hogan
Manager, Standards and Compliance
