Subject: Cascade Natural Gas – In Situ Testing for Pipe Grade

Mr. Subits:

As part of Cascade Natural Gas's (Cascade's) effort to meet the terms of the Stipulated Agreement that is part of Docket PG-150120, Cascade is scheduled to begin in situ testing for pipe grade and wall thickness on July 18, 2016. Testing locations were selected in accordance with the process outlined in the Technical Memorandum prepared by Parametrix on January 8, 2016 and sent to the WUTC on April 15, 2016. Das-Co of Idaho will be the excavation contractor and Parametrix will provide onsite project supervision as well as project management. Testing will be performed by ABI Services according to the methodology approved in the letter from WUTC on January 12, 2016.

Attached is a schedule for the testing planned in 2016. Testing will be performed in the Bremerton, Bellingham, and Mt. Vernon Districts. If you have any questions or would like additional information, please feel free to contact me at [jeremy.ogden@cngc.com](mailto:jeremy.ogden@cngc.com) or 509-734-4509.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Ogden", with a horizontal line extending to the right.

Jeremy Ogden, P.E.  
Director, Engineering Services  
Cascade Natural Gas Corporation
