**STAFF OF  
WASHINGTON UTILITIES AND  
TRANSPORTATION COMMISSION**

*PacifiCorp Response to WUTC Staff Data Request No. 88  
(Excerpt)*

**February 16, 2007**

**WUTC Staff Data Request 88**

Please rerun the GRID model with the following adjustments:

- a) transmission expense and east regulating margin corrections identified in Company data responses,
- b) forecast loads for the test period, and
- c) a share the benefit sale out of Bridger at Borah Brady to the east control area.

**Response to WUTC Staff Data Request 88**

The requested information is provided as Attachment WUTC 88. To implement Section C, the Company made the following assumptions:

the sale was based on HLH transfers from Bridger net of the portion of Bridger allocated to the east control area under WCA,

the net volume available for sale was reduced by 40 percent to account for competition from other generators, which could also sell to the east control area,

the price of the sale is equal to the Mid C price plus a share of the margin, and

the margin share is equal to the difference between Mid C and Four Corners market prices and is split 40 percent to the west control area.
