2. WAC 480-123-130(1)(b) - Use of Support

The funds received by the Company from the universal communications services program in calendar year 2018 represent monies that the Company formerly received through the Washington Exchange Carrier Association (WECA) pooling process and the reduction of support under the Federal Communications Commission's (FCC's) Connect America Fund InterCarrier Compensation Fund (CAF ICC) program. As such, the funds from the universal communications services program contributed to defrayal of the ongoing operation and maintenance expenses of the Company. The funds from the universal communication services program are contributing to the Company's ongoing provision of high-quality basic telecommunications service to customers residing in the area the Company serves.

In December 2018, the Company received \$3,236 from the universal communications services program for the fiscal year ending June 30, 2019.

During the first six months of 2019, the Company did not undertake any capital projects, but incurred \$22,381 in operating expenses relating to the maintenance of the network and provisioning of services. The funds received from the universal communications services program can be viewed as contributing to the Company's ability to perform this work, including, without limitation, the repayment of loan funds. In the second half of 2019 the Company plans to continue to look for ways of improving the network and provisioning of services.

3. WAC 480-123-130(1)(c) - Unfilled Consumer Requests for New Basic Telecommunications Service*

None

* Service requests that are ongoing but still within normal processing times are not counted as unfulfilled.

4. WAC 480-123-130(1)(e) - FCC Form 477

This form was previously filed on or about March 1, 2019 under Docket UT-19xxxx.

5. WAC 480-123-130(1)(f) - Report on Operational Efficiencies/Business Plan Modifications

The Company continually reviews its operations to determine if efficiencies can be achieved. The Company already has a plan in place to concentrate on improving broadband service while continuing to provide high-quality basic telecommunications service to the customers that are located within the area that the Company serves. The funds received from the universal communications services program can be viewed as assisting in the Company's efforts to obtain operational efficiencies. The Company is transitioning to an entirely new OSS/BSS platform over the next year, which will provide greater efficiencies and effectiveness in responding to customer needs.
