Subject: Daily Electric Vehicles Charging Initiative

All

I have no experience in writing legislative proposal, let alone, write is not my strong side, however with the [dire US climate report](#) out actions has and must come from everywhere. Here is my proposal that will make a change for the better:

Drive electric, must be expanded into low income and mass adaption across our state and the rest of the country. At this link "[Daily Electric Vehicles Charging Initiative](#)" I have written down my experiences, thoughts and ideas on how to propagate more incentives to drive electric in the state of Washington. Please review and let me know your thoughts on how best to proceed getting it to the Washington legislators upcoming 2019 session. I'll be seeking feedback from a number of people over the next week. I anticipate in a week or so I'll be done with my edits and file this proposal with the UTC, under UE-160082. If you have feedback in the form of an e-mail I'll attache it to my filling. (UTC please provide any feedback you can provide before I file this officially)

I appreciate your feedback.

Regards
