Petition for an Order Approving Deferral of Costs Related to Wildfire Claims.

DOCKET UE-230495

COMMISSION STAFF RESPONSE TO PETITION FOR ACCOUNTING DEFERRAL ORDER

I. INTRODUCTION

The Commission should deny this petition. The costs described in the petition are not recoverable from Washington ratepayers. Because the costs described cannot be collected in Washington rates, the petition for deferred accounting of those costs should be denied.

II. RELIEF REQUESTED

Commission staff (Staff) requests that the Commission deny the petition.

III. STATEMENT OF FACTS

PacifiCorp (PacifiCorp or Company) "requests authorization to defer the incremental costs associated with PacifiCorp's third-party claims for the wildfires that occurred in September of 2020." These incremental costs are "the third-party claims that may exceed the Company's insurance coverage currently in rates associated with the outcomes of this litigation due to wildfires that occurred in September 2020." The wildfires in question and the resulting third party claims all occurred in Oregon and California. The petition highlights the *James v. Pacificorp* case, in which the Company was found liable for

a total of \$88 million dollars.⁵ In that case, the jury found PacifiCorp grossly negligent, and found the Company's conduct was both reckless and willful.⁶

IV. LEGAL STANDARD

The Commission may authorize utilities to defer expenses or revenues to recognize them in a later period.⁷ The Commission will grant a petition for deferred accounting if it finds extraordinary circumstances.⁸ The amount in question must be material.⁹ When setting an electric utility's authorized rates, the Commission must set rates that are equitable, fair, just, reasonable, and sufficient.¹⁰ To that end, a regulated utility is only allowed to recover costs prudently incurred to serve the ratepayers within its service territory.¹¹ The Commission may deny the recovery of imprudent expenditures.¹²

V. ARGUMENT

The Commission should deny a petition for deferred accounting where the costs in question could not be included in Washington customer rates. Under the Commission's

standards, there is no scenario in which the Commission would permit a regulated entity to recoup the costs of a judgment stemming from a lawsuit wherein the company was found grossly negligent regarding incidents that occurred in a different state.

6

First, the costs described in the petition are not related to serving Washington state customers. The incremental expenses related to the judgments against PacifiCorp do not benefit Washington ratepayers in any way, nor was incurring these costs necessary to provide Washington ratepayers with electric service. To the extent that the Company should be allowed any recovery from any ratepayers, that recovery should come from the states in which these incidents occurred and the judgment was determined against the Company. The recovery sought by the Company in this petition is not for costs related to any needed repairs or reconstruction as a result of these fires, nor are they increases in insurance costs; the costs at issue in this matter -as defined by the petition- are solely related to the civil judgments against the Company. These judgments are akin to costs that the Commission excludes from a regulated utility's revenue requirement, such as advertisements, lobbying, and charitable donations. 13 These costs are considered below-the-line for a reason: they are not necessary to serve customers. The actions that led to the judgments against PacifiCorp were likewise unnecessary to serve Washington customers. These costs are the result of imprudent decisions made by the Company; they were not incurred in the normal course of providing service to ratepayers.

¹³ See, Wash. Utils. & Transp. Comm'n v. Puget Sound Pilots, Docket TP-190973, Order 09, p. 95, ¶ 326 (Nov. 25, 2020) (Puget Sound Pilots 2019 GRC Order) (Describing "political lobbying, dues, and advertising costs" as "expense items not allowed in regulatory accounting"); Regulatory Assistance Project, Electricity Regulation in the US: A Guide 2nd edition, p. 58 (2016) ("Most commissions exclude costs that are not required to provide service, such as charitable contributions by the utility, political lobbying expenses, and image-building advertising[.]"); see also, Jewell v. Wash. Utils. and Transp. Comm'n, 90 Wn.2d 775, 779-81, 585 P.2d 1167 (1978) (Charitable donations not recoverable from ratepayers).

Second, even if these events had occurred in the Company's Washington service territory, the Commission would not permit recovery of the costs from ratepayers. ¹⁴ The petition cites no case law, statute, or commission rule supporting the proposition that a judgment in which a regulated utility is found grossly negligent is nonetheless recoverable through customer rates. It would not be reasonable to allow recovery from civil judgments in which a Company was found grossly negligent. Acting negligently is not acting prudently, as both Oregon and Washington's case law on gross negligence clearly indicate. ¹⁵ Prudence is a reasonableness test. ¹⁶ Although gross negligence is defined differently in different jurisdictions, grossly negligent conduct under any definition is also unreasonable conduct. ¹⁷ Therefore, the same decision cannot be both grossly negligent and prudent.

8

Furthermore, Washington ratepayers already contribute to the cost of mitigating the risk of these kinds of claims. PacifiCorp's insurance expense is a cost included in rates. ¹⁸ Washington customers already bear the risk of civil judgments against the Company by paying for those premiums in rates. That PacifiCorp is subject to even further costs because of its own gross negligence does not justify additional collection from ratepayers. It is clear

Power & Light Co., Docket UE-152253, Order 12, p.33, ¶ 94 (Sept. 1, 2016) ("The Commission has often cited the prudence legal standard as thus: What would a reasonable board of directors and company management have decided given what they knew or reasonably should have known to be true at the time they made a decision?").

¹⁷ See n.15.

that even if the incremental costs were material, inclusion of these costs in customer rates would be inappropriate.

9

Third, any impact on the financial stability of the Company as a result of these claims can be addressed through a cost of capital decision in a future rate case. If the Commission permits it,¹⁹ PacifiCorp may reply that it is in the public interest to grant the petition because of the potential consequences if the Company is not allowed to defer and recover these costs. In the petition, the Company states:

The combined amount of these claims from these wildfires may represent a material impact to the financial stability of the Company that resulted from unique and unforeseen circumstances outside the Company's reasonable control. ... The potential magnitude of the claims may exceed normal costs anticipated by PacifiCorp and included in its retail rates and could also far exceed the reasonable business risk associated with these claims.²⁰

The ultimate costs of the claims against PacifiCorp are unknown, as the petition acknowledges. But for the sake of argument, let us accept as true that the judgments will ultimately be large enough that the incremental costs represent a material impact on the financial stability of the Company. Even if true, this would not warrant authorizing deferred accounting of costs that could not otherwise be included in customer rates. A material impact on company earnings is a necessary but not sufficient element when considering a petition to defer accounting. ²¹ In the event that the claims in question do impact the financial stability of the Company, that issue could be properly addressed in the next rate case when determining the cost of capital. At that point, the Commission would consider the financial stability of the

²¹ For example, the Commission would not allow rate recovery of lobbying/political donations even if those below-the-line costs materially impacted the company's earnings.

Company when making decisions related to return on equity²² and whether to authorize a hypothetical capital structure.²³ Because the wildfire claims are not recoverable from Washington customers, future cost of capital decisions would be the appropriate vehicle to address any issues related to the impacts these judgments may have on PacifiCorp's overall financial stability.²⁴

VI. CONCLUSION

10

The Commission should deny a deferred accounting petition when the Commission would not approve including those costs in customer rates. By seeking deferred accounting for later recovery of the costs in question, PacifiCorp effectively argues that its investors should pay no portion of the wildfire judgments against the Company. Customers already pay insurance costs through rates. PacifiCorp, like all investor-owned utilities, is not guaranteed recovery in all instances,²⁵ and is certainly not entitled to recover expenses resulting from gross negligence. An authorized return is included in the Company's approved rates in recognition of those risks. Staff can think of few examples where it is clearer that ratepayers should not bear a particular cost than this case.

²² The cost of equity is an estimate of the likely return an investor would require to invest in an enterprise with comparable risks. *See Fed. Power Comm'n v. Hope Nat. Gas Co.*, 320 U.S. 591, 64 S. Ct. 281, 88 L. Ed. 333 (1944); *Bluefield Waterworks & Impr. Co. v. Pub. Serv. Comm'n of W. Va.*, 262 U.S. 679, 43 S. Ct. 675, 67 L.Ed. 1176 (1923).

²³ Wash. Utils. & Transp. Comm'n v. Puget Sound Energy, Inc., Dockets UE-040640 & UG-040641, Order 06, 13, ¶ 27 (Feb. 18, 2005) (The Commission must balance the "economy" of lower cost debt with the "safety" of higher cost common equity.)

²⁴ Staff does not suggest that in this scenario it would necessarily be appropriate to adjust ROE or the capital structure to compensate for any and all financial impacts that were the result of the wildfire claims. The Commission would need to assess the facts of the case and determine whether compensating the Company to address financial stability is fair and reasonable in light of the circumstances.

²⁵ See e.g., Willman v. Wash. Utils. & Transp. Comm'n, 122 Wn. App. 194, 204, 93 P.3d 909 (2004) ("A utility is not permitted to recover every expense in its rate structure; the WUTC 'has the power to review operating expenses incurred by a utility and to disallow those which were not prudently incurred.'") (quoting People's Org. for Wash. Energy Res. v. Utils. & Transp. Comm'n, 104 Wn.2d 798, 810, 711 P.2d 319 (1985); Puget Sound Pilots 2019 GRC Order at 10, ¶ 36 ("By setting rates based on the cost of providing service, the Commission sets "an authorized rate of return which represents an opportunity, given wise and efficient management, to earn that return." citing WUTC v. Puget Sound Power & Light Company, Cause No. U-83-84, Order p. 57-58 (Sept. 28, 1984)).

If "no" for any of the fire areas your verdict on Claim Six is against a finding of causation as to the entire class for that fire area and for the defendant for that fire area. Please proceed to the instructions below and Question 21.

CLASS REPRESENTATIVE PLAINTIFFS' INDIVIDUAL DAMAGES

If you answered "yes" to question 2, question 5, question 10, question 13, or question 16 for some or all of the four fire areas, or if all were answered "yes", please proceed to question 21 and answer the plaintiffs' individual damages questions for any fire area to which you answered "yes" for question 2, question 5, question 10, question 13, or question 16. At least nine of you who agreed to those answers for a particular fire area, must also agree on your answers to question 21 and question 22 for the same fire area.

If you did not answer "yes" to question 2, question 5, question 10, question 13, and question 16 for a particular fire area then your verdict is against plaintiffs for that fire area and for the defendant for that particular fire area. Do not answer questions 21 or question 22 for that particular fire area. Otherwise, please proceed to question 21.

Please proceed to the instructions below and Question 23.

<u>PLAINTIFFS' INDIVIDUAL DAMAGES – SIXTH CLAIM FOR RELIEF INVERSE</u> <u>CONDEMNATION</u>

If you answered "yes" to question 19, for some or all of the four fire areas, please proceed to question 23 and answer the plaintiffs' individual damages questions for any fire area to which you answered "yes" for question 19. At least nine of you who agreed to those answers for a particular fire area, must also agree on your answers to question 23 for the same fire area.

If you did not answer "yes" to question 19, for a particular fire area then your verdict is against plaintiffs for that fire area and for the defendant for that particular fire area. Do not answer questions 23 for that particular fire area. Otherwise, please proceed to question 23.

QUESTION 23: What amount of just compensation, if any, do you award each of the following Plaintiffs?
